Bilaterals Programme – delivery plan

Bulk submission deferrals reason code - discussion

Issue: suggested that when we implement the deferral “bulk” submission reason code, we also need to lift the 30 business day deferral cap

- ◆ Needs to be fully impact assessed by MOSL - SLAs and Deferrals is a very complex area

Options for discussion:

1. Implement a change to deferrals – at additional cost?
2. Implement at the expense of other processes/deliverables?
3. Implement the reason code without a change to Deferrals and TPs manually manage their deferrals. TPs encouraged/reminded to operate within the bulk submission guidance that already exists, i.e. stagger the submissions to avoid bulk.
4. HVI TPs could potentially explore an automation of Deferrals management, which could end a Deferral and start a Deferral instead of headcount increase. Nb: need to ensure that bad behaviours are not introduced
5. Other(s)?

Ticket no : 0017719 / #10764

Raised by: Anglian Water – T291.M

Issue: The **submitted meters tag** (refer to JSON below) doesn't seem to align with the CSD. The same tag is causing some parsing issues for TP

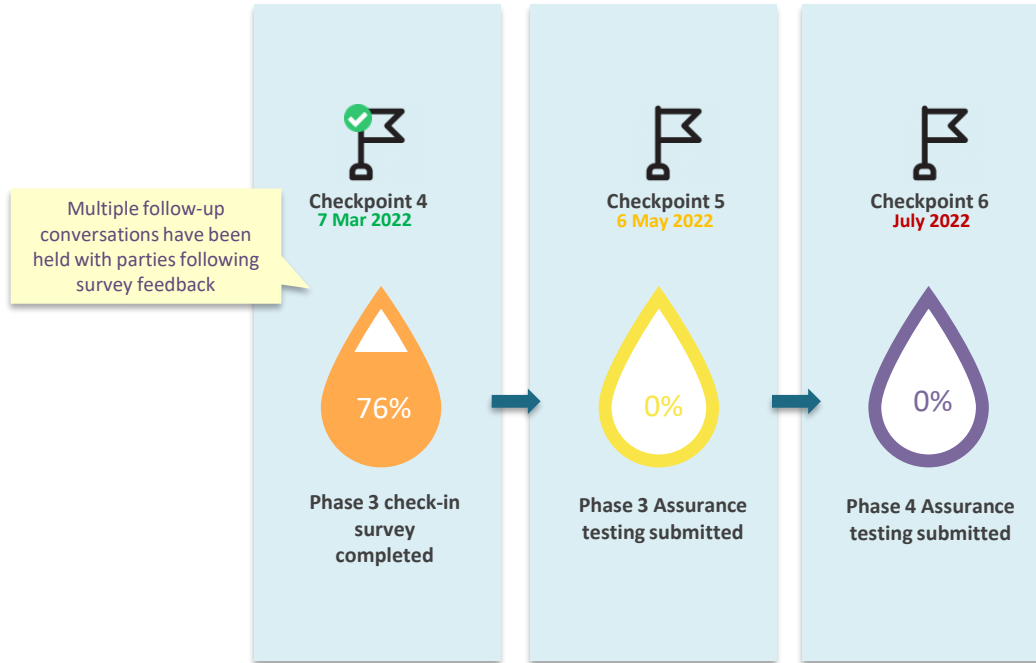

- Submitted Meters tag getting populated as Submitted Meter (i.e. 's' missing)
