

# Outstanding PAG questions

20<sup>th</sup> December 2024

# Agenda

---

	Item	Presenter	Time
1	Welcome & update	Chris Dawson (Chair)	10 mins
2	Reporting under the new MPF (M18 & M15)	Katy Woodhouse	40 mins
3	<b>Upcoming PAG workshops &amp; AOB</b>	<b>Chris Dawson</b>	<b>10 mins</b>
			<b>Total: 1 hour</b>

# To cover

---

- M01 and Temporary Disconnection
- Progress update on Skip Codes

# 1. M01 and Temporary Disconnection

# **M01 and Temporary Disconnection**

---

## **History**

- Considered at PAG 42 on 2 July
- MOSL proposed that TP likely preferred option was to exclude temporary disconnection meters
- TPs decided they should be included.

## **TP member rationale at the time**

- Temporarily disconnected meters are still tradeable, often left in situ and often disconnected only for short time
- Reads are important for debt control and guards against illegal reconnection
- If meter is removed, it should have been removed from CMOS

## **Further mitigation**

- Temporary disconnected meters, approx 0.05%
- Visual X and Y reads count toward a cyclic read pass. Virtually no estimated reads in last 12 months

## **2. Skip Codes update**

# Skip Codes Update

---

## RFI response

- 21 responses
- 4 TPs use RWG skip codes, 6 use RWG + additional codes, 16 use their own codes.

## MOSL working on

- Data analysis
- Initial thoughts: Good number of TP codes may be analogous to RWG codes
- Mapping exercise at TP level. Produce aggregated stats.

## Change proposal

- Investment approval board: Jan (emerge phase) /Feb 2025 (plan phase)
- CCC Change plan approval in March or April
- Anticipate consultation May leading to **“happy path”** or **“longer path”**:

# Skip Codes Update

	Happy Path	Longer Path
Looking for	<ul style="list-style-type: none"> <li>• Consultation feedback shows proposals are not contentious and TPs endorse</li> <li>• No working group or further RFIs/consultations needed</li> <li>• Written solution and recommendation report clear to CCC</li> </ul>	<ul style="list-style-type: none"> <li>• Trickier if consultation throws up that we need further consideration of the problem statement/ solution/ evidence</li> <li>• <b>Working group</b> or further market engagement needed</li> <li>• Business case for the change is less clear</li> </ul>
Final Report to submitted to Ofwat:	End July 2025	End February 2026
Implementation:	May 2026 (earliest possible release)	December 2026

# Upcoming PAG workshop(s)\*

Date	For discussion	Detail
25 December		Cancelled
8 January 2025	Financial tools*	Charges and performance standards for M01
15 January 2025	Financial tools*	Charges and performance standards / Consultation 5
22 January 2025	TBC	
30 January 2025	TBC
