

Tariff Timetable 2023/2024

The purpose of this document is to set out the dates for the annual process for wholesalers to create and update wholesaler tariff data for the following year. These dates are allocated, taking into consideration the reasonable time required for Wholesalers to create, update, verify and authorise their wholesaler tariff data in accordance with their wholesaler tariff document.

This timetable takes into account the requirement for the April P1 settlement run to make use of the wholesaler tariff data applicable for the following year.

For additional information about the tariff timetable, please follow the link here for [CSD 0208 \(Submission and validation of wholesaler tariff data\)](#)

Tariff update dates

The below timetable sets out the dates for:

- **The initial update date** – which refers to the first date that wholesaler tariff data may be updated within CMOS.
- **The final update date** – which refers to the last date that wholesaler tariff data may be created, updated, and verified within CMOS. **Please note, any changes after this point will require an Ad-hoc tariff window and may not be actioned prior to publication of the April P1 Settlement Run.**
- **The authorisation date** – which refers to the date by which the wholesaler’s contract manager shall confirm to MOSL that all of the wholesaler tariff data has been created, updated and verified and in doing so, authorises the use of the revised wholesaler tariff data.

Please note that the below timetable takes into account the above dates for both the test (MPS2) and production environments.

Month	Initial update date (MPS2)	Initial update date (Production)	Final update date (MPS2)	Final update date (Production)	Authorisation date (MPS2)	Authorisation date (Production)
January	09/01/2023	18/01/2023				
February			17/02/2023	24/02/2023	22/02/2023	
March						01/03/2023
