Change Proposal/ Charging Change Proposal Details

Description of (i) the issue or defect which this Change Proposal seeks to address

Where a transaction has been submitted via an HVI Document, the drill down to the BTD shows all transactions on the document and not the single specific transaction relevant to the BTD step. When the XML is displayed on the portal, the single transaction only should be shown.

Alternatively, render the single transaction XML into a display table that shows field labels rather than XML tags.

Description of the Change Proposal its nature and purpose and (for Change Proposals only) how it is consistent with the Principles and falls within the Objectives noted below,

Proposal

The proposal is to display only the XML relevant to the selected transaction.

Alternatively render a screen that shows field labels and content rather than the XML tags that may be difficult to interpret.

This will ensure relevant details are not missed and improve time spent on querying the content of the transaction.

Principles and Objectives

Description of the principles and objectives affected by the Change Proposal on the items below.

Principles	Affected (Y/N)	Description
Efficiency	Y	It will help to improve usability and interpretation of the transaction content.
