Contents

Contents	9
Part A: New connections	42
Process A1 – Application to be Registered as the Retailer to a newly connected Supply Point	43
Part B: Metering	44
Process B1 – Installation of a meter performed by the Wholesaler	48
Process B2 – Installation of a meter performed by an Accredited Entity	48
Process B3 – Meter accuracy test performed by the Wholesaler	49
Process B4 – Meter accuracy test performed by an Accredited Entity	49
Process B5 – Repair or replacement of a faulty meter performed by the Wholesaler	50
Process B6 – Repair or replacement of a faulty meter performed by an Accredited Entity	50
Process B7 – Change to size, model or location of meter performed by the Wholesaler	51
Process B8 – Retailer requested change to size or location of the meter performed by an Accredited Entity	51
Process B9 – Retailer requested change of meter performed by an Accredited Entity (other than a replacement following a fault or a change to the size or location of the meter)	52
Process B10 – Wholesaler requested installation or change of meter performed by the Wholesaler (other than a replacement following a fault)	52
Process B11 – Retailer request for Wholesaler to carry out Meter Read for a Non-Market Meter pending Transfer or allocation of a Supply Point	52
Process B12 (merged) – Request relating to Private Meter or Cross Border meter	53
Process B13 – Testing, repairing and replacing Private Meters necessary for calculation of Primary Charges for Trade Effluent Services, or Trade Effluent Services and Foul Sewerage Services	53
Process B14 – Exchanging Private Meters necessary for calculation of Primary Charges for Trade Effluent Services, or Trade Effluent Services and Foul Sewerage Services	53
Process B15 – Installing Cross Border Meters necessary for the calculation of Primary Charges for Sewerage Services	53
Process B16 – Testing, repairing and replacing Cross Border Meters necessary for the calculation of Primary Charges for Sewerage Services	54

Process B17 – Exchanging Cross Border Meters necessary for the calculation of Primary Charges for Sewerage Services	54
Part C: Confirmation and verification of supply arrangements	55
Process C1 – Verification of meter details or supply arrangements	56
Process C2 – Gap Sites identified by the Wholesaler	56
Process C3 – Application in respect of Gap Sites proposed by the Retailer	56
Process C4 – Identified Missing Service Components	56
Process C5 – Deregistration of a Supply Point (including as a result of an incorrect or erroneous Registration or a change of circumstance) or removal of Service Components	57
Process C6 – Application in respect of Deregistration of a Supply Point (including as a result of an incorrect or erroneous Registration or a change of circumstance) or removal of Service Component at the request of the Retailer	57
Process C7 – Supply Point Address Amendment	57
Part D: Planned activities and affected services	58
Process D1 – Notification of capital works that may have an impact on Non-Household Customers - long-term planning	59
Process D2 – Short-term planned activities	59
Process D3 – Reactive activities	60
Part E: Unplanned events and incidents	60
Process E1 - Identification of Sensitive Customers	68
Process E2 – Maintenance and implementation of Wholesaler Public Health Related Site Specific Arrangements for managing events and incidents potentially affecting public health	68
Process E3 – Unplanned changes to supply of Water Services and/or Sewerage Services	68
Process E4 – Drinking water quality incidents	68
Process E5 – Sewer Flooding and Other Public Health Risks such as pollution incidents or unconsented Trade Effluent discharges	69
Process E6 – Droughts, dry weather conditions and other circumstances which give rise to water shortages	69
Process E7 – Emergencies (i.e. civil emergencies or national security events)	69
Part F: Monitoring, investigations, complaints and enquiries	70

Process F1 - Unannounced and/or unplanned visits to Eligible Premises relating to compliance	72
Process F2 - Announced planned visits to Eligible Premises relating to compliance	72
Process F3 – Visits by the Wholesaler to Eligible Premises not covered by other processes	72
Process F4 –Non-Household Customer enquiries	72
Process F5 – Non-Household Customer complaints	72
Process F6 – Water Fittings Regulations enquiries and notifications	73
Part G: Trade Effluent	74
Process G1 – Trade Effluent enquiries	75
Process G2 (Merged) –Trade Effluent Consents	75
Process G3 – Variation of Trade Effluent Consents	75
Process G4 – Trade Effluent monitoring	76
Process G5 – Discontinuation of Trade Effluent Consent	76
Process G6 – Termination of Trade Effluent Consent	76
Part H: Allowances, assessment requests and applications	77
Process H1 – Application for an allowance and/or Volumetric Adjustment	78
Process H2 – Application for a Contribution Offer in respect of installing a meter at an Unmeasured or Assessed Service Component	78
Process H3 (merged) – Review of unmetered charges or change in Tariff	78
Process H4 – Wholesaler notice of change in Tariff applied to a Service Component	79
Process H5 – Retailer application for change in Tariff applied to a Service Component	79
Process H6 [NOT IN USE]	79
Process H7 - Application for Vacancy Incentive Scheme Payment	79
Part I: Disconnections	84
Process I1 – Disconnections	86
Process I2 – Disconnection requested by the Retailer and performed by an Accredited Entity in relation to Non-Household Customer non-payment	86
Process I3 – Disconnection performed by the Wholesaler for illegal use	87
Process I4 – Disconnection performed by the Wholesaler for breach of Water Fittings Regulations	87

Process I5 - Disconnection requested by the Non-Household Customer and performed by the Wholesaler	87
Process I6 – Disconnection requested by the Non-Household Customer and performed by an Accredited Entity	87
Process I7 – Gaining entry to an Eligible Premises for the purposes of Disconnection using the Wholesaler's powers of entry at Retailer request	87
Process I8 – Reconnection requested by the Retailer and performed by the Wholesaler	88
Process I9 – Reconnection requested by the Retailer and performed by an Accredited Entity	88
Process I10 – Reconnection performed by the Wholesaler following rectification of a breach of Water Fittings Regulations	88
Process I11 – Reconnection performed by the Wholesaler following a Disconnection requested by the Non-Household Customer	88
Process I12 – Reconnection performed by an Accredited Entity following a Disconnection requested by the Non-Household Customer	88
Process I13 – Disconnection performed by the Wholesaler in relation to non-payment in cases of a Self-Supply Retailer	88
Part J: Accredited Entity performed activity	89
Process J1 – Advance notice of activities performed by an Accredited Entity	91
Process J2 – Notifying of activities completed by an Accredited Entity	91

Part 3: Operational Terms

1 Introduction

1.1 Purpose

- 1.1.1 This Part 3 of Schedule 1 of the Wholesale Contract sets out the Operational Terms which describe how the Wholesaler and the Retailer co-ordinate operational activities that are necessary for the Wholesaler's provision of Water Services and/or Sewerage Services to the Retailer. Operational Subsidiary Documents are available where processes have been developed for use within the Bilateral Hub. All references to Operational Terms include the relevant OSDs as appropriate. Detailed processes, responsibilities and timescales for each process available in the Bilateral Hub are set out in the relevant OSD. A full list of all OSDs is set out in Section 5 of these Operational Terms.
- 1.1.2 These Operational Terms set out the mechanics of raising and responding to Requests. Where the relevant process is available via the Bilateral Hub, all Requests shall be progressed through the Bilateral Hub. Forms shall be used where the relevant process is not available via the Bilateral Hub.
- 1.1.3 In applying these Operational Terms, the Wholesaler shall act transparently and not discriminate between Retailers.

1.2 Scope

- 1.2.1 These Operational Terms make provision for operational activities and set out the process steps to be followed in order for Trading Parties to complete these operational activities. Unless the contrary intention appears, operational activities that have commenced and are not completed prior to the implementation of the relevant process into the Bilateral Hub shall be continued in accordance with the previous operation of this Wholesale Retail Code applicable immediately prior to the relevant implementation date (as set out in the table below).
- 1.2.2 A Data Owner shall raise a Request when interaction or communication is required with another Trading Party, otherwise the Error Rectification and Retrospective Amendments process (CSD 0105) shall be used.

Part	Description	Process	Bilateral Hub Implementation Data
A: New Connection	Sets out the process by which the Retailer applies to be Registered to a New Supply Point if it is not arranging the connection.	A1	13 March 2024
B: Metering	Sets out the processes for metering work such as the installation, accuracy testing, repair or replacement of faulty meters and changes of model, size and location of meters.	B1	2 August 2022
		B2 [no longer in use, moved under processes J1 and J2]	N/A
		B3	29 November 2022
		B4 [no longer in use, moved under processes J1 and J2]	N/A
		B5	31 May 2022
		B6 [no longer in use, moved under processes J1 and J2]	N/A
		B7	2 August 2022

Part	Description	Process	Bilateral Hub Implementation Data
		B8 [no longer in use, moved under processes J1 and J2]	N/A
		B9 [no longer in use, moved under processes J1 and J2]	N/A
		B10 [no longer in use, use B1, B7 or D2 as applicable]	13 March 2024
		B11	13 March 2024
		B12 (merged)	13 March 2024
		B13 [no longer in use, merged with B12]	13 March 2024

Part	Description	Process	Bilateral Hub Implementation Data
		B14 [no longer in use, merged with B12]	13 March 2024
		B15 [no longer in use, merged with B12]	13 March 2024
		B16 [no longer in use, merged with B12]	13 March 2024
		B17 [no longer in use, merged with B12]	13 March 2024
C: Confirmation and verification of supply arrangements	Sets out the processes for verification of meter details or supply arrangements, applications for the Registration of Gap Sites; identification of missing Service Components, Deregistration of a Supply Point with no corresponding physical Disconnection or removal of a Service Component,	C1	22 September 2021
		C2	29 November 2022
		C3	29 November 2022
		C4	27 September 2023
		C5	29 November 2022

Part	Description	Process	Bilateral Hub Implementation Data
	and amendments to the VOA BA Reference or UPRN at a Supply Point.	C6 [no longer in use, merged with C5]	29 November 2022 [through C5]
		C7	27 September 2023
D: Planned activities and affected services	Sets out processes for notifying the Retailer and Non-Household Customers of long-term, short-term and reactive activities affecting the supply of Water Services and/or Sewerage Services and of the areas affected by such activities.	D1	26 June 2024
		D2	26 June 2024
		D3	26 June 2024
E: Unplanned events and incidents	Sets out processes relating to identifying Sensitive Customers, implementing and maintaining Public Health Related Site Specific Arrangements, identifying and managing unplanned changes to Water Services and/or Sewerage Services, particularly as regards communications between the Wholesaler and the Retailer in relation to potential drinking water quality incidents, Sewer Flooding and Other Public Health Risks such as pollution incidents or unconsented Trade Effluent discharges, managing droughts, dry weather conditions and other circumstances which give rise to water shortage, and Emergencies.	E1	26 June 2024
		E2	26 June 2024
		E3	26 June 2024
		E4	26 June 2024
		E5	26 June 2024
		E6	26 June 2024
		E7	26 June 2024

Part	Description	Process	Bilateral Hub Implementation Data
F: Monitoring, investigations, complaints and enquiries	Sets out processes for Wholesaler visits to Eligible Premises for certain monitoring or investigation purposes or visits not covered by other processes, enquiries or complaints received from Non-Household Customers, including enquiries in relation to the application of the Water Fittings Regulations, and Water Fittings Regulations notifications received by the Retailer.	F1	13 March 2024

Part	Description	Process	Bilateral Hub Implementation Data
		I13 [no longer in use, merged with I1]	12 December 2023
J: Accredited Entity performed activity	Sets out processes for Accredited Entity performed or completed metering, disconnection and/or reconnection activities.	J1	26 June 2024
		J2	26 June 2024

1.2.3 These Operational Terms also set out the roles and responsibilities that apply where Trading Parties seek to complete operational activities (section 2), terms for the use of Accredited Entities to undertake activities (section 3), and principles regarding Wholesale Charges, requests for Wholesale services, and service of statutory notices (section 4).

1.3 Process-flow diagrams

1.3.1 Annexes A to I to these Operational Terms contain process flow-diagrams which illustrate the steps for each of the processes. Process flow-diagrams may also be contained within the OSDs where processes have been developed for use within the Bilateral Hub. These process-flow diagrams are provided for illustrative non-binding purposes only. In the event of any conflict, inconsistency or ambiguity between the written process steps in these Operational Terms or an OSD and the diagrams set out in Annexes A to I to these Operational Terms or within the relevant OSD, the written process steps in these Operational Terms or the relevant OSD shall take precedence.

2 Roles and Responsibilities of Trading Parties

2.1 Communication and provision of information between the Wholesaler and the Retailer

- 2.1.1 In following the processes set out in these Operational Terms, the Wholesaler and Retailer shall be required to communicate and share information with each other. The Wholesaler and Retailer are expected to keep each other advised of the relevant contact arrangements in their respective organisations for dealing with Requests, as well as for any notifications and related enquiries under these processes, where such Requests, notifications and related enquiries can not be performed through the Bilateral Hub. They must also have arrangements in place to support the safe and timely receipt of written communication, including Requests.
- 2.1.2 The Wholesaler and Retailer shall also advise of the contact arrangements for twenty-four (24) hour on-call arrangements set out below under heading C (24 hour contact arrangements) of part E (Unplanned events and incidents), for example where the Wholesaler needs the Retailer's support for communications with Non-Household Customers in relation to an unplanned event or incident. The Retailer shall on a mutually agreed basis make available to the Wholesaler Non-Household Customer contact details to be used in part E (unplanned events and incidents) where available to ensure effective communications. For clarity, these Non-Household Customer contact details are only to be used by the Wholesaler for the purpose of communicating with Non-Household Customers during unplanned events and incidents.
- 2.1.3 Where the Retailer is a Self-Supply Retailer, the Wholesaler is not required to give any advance notice of any visit to Eligible Premises as described in these Operational Terms or to give separate notice to or to reach separate agreement with the Retailer in respect of the relevant process.

2.2 Bilateral Hub and Forms

- 2.2.1 Trading Parties are required to use the Bilateral Hub created and maintained by the Market Operator in accordance with the Market Terms to raise, progress and complete Requests where the relevant process is available and the Request has been commenced via the Bilateral Hub. Where a process is not available through the Bilateral Hub, or the relevant process was commenced and has not yet been

completed prior to the implementation date of the relevant process (as set out in the table at Section 2.1 above) Trading Parties shall use Forms.

2.2.2 The communication of relevant information and updates relating to any Request raised in the Bilateral Hub should occur through the Bilateral Hub and shall take precedence over information submitted via any other means. Trading Parties may use the comment functionality set out in OSD 0701 (Bilateral Common Processes) to fulfil the obligations in Section 2.1.

2.2.3 Subject to any individual conditions which apply to the relevant process, the Bilateral Hub shall allow:

- (a) the Contracting Retailer to raise Requests for Supply Points registered to them.
- (b) the Other Retailer to raise Requests in relation to Supply Points at the Eligible Premises.
- (c) the Contracting Wholesaler to raise Requests for Supply Points registered to them.
- (d) the Other Wholesaler to raise Requests in relation to Supply Points at the Eligible Premises.

If the Retailer or Wholesaler no longer has the Supply Point Registered to them or is not providing Retail Services or Water Services and/or Sewerage Services to the Eligible Premises, it shall cease to be entitled to raise and update Requests.

2.2.4 In the event that any Trading Party identifies that they intend to or are planning to undertake a Programme of Works, or where other circumstances arise which may result in an above average volume of Requests, the Trading Party shall inform all relevant Contracting Retailers or Contracting Wholesalers immediately. Prior to commencing the submission of any such above average volumes of Requests, the Contracting Retailer and Contracting Wholesaler should agree bespoke agreements to manage the impact of Request submission in the Bilateral Hub. Any such arrangements must be recorded in writing using the template provided by the Market Operator and are anticipated to cover arrangements for submission, prioritisation and delivery of Requests to address any management of resources required by above

average volumes of Requests which either Trading Party would consider to require management. Prioritisation of Requests should take into account whether Requests are High Impacting Requests or Low Impacting Requests. The submission and delivery of High Impacting Requests must be prioritised over the submission and delivery of Low Impacting Requests, and Trading Parties must not stockpile or otherwise delay the submission and delivery of High Impacting Requests.

- 2.2.5 The Market Operator may produce guidance to assist Trading Parties in agreeing bespoke agreements and identifying Low Impacting Requests or High Impacting Requests.
- 2.2.6 Trading Parties shall work co-operatively when planning any Programmes of Work which may affect other Trading Parties, and submissions of an above average volume of Requests, with the goal of achieving appropriate prioritisation and management of Requests.
- 2.2.7 Additional general provisions, and a mechanism for managing Requests where Trading Parties cannot agree a bespoke agreement, are contained in the provisions of Section 16 of OSD 0701 (Bilateral Common Processes).
- 2.2.8 Adherence to any bespoke agreement and/or the general provisions for management of higher than average volumes of Requests may be taken into account through Additional Performance Indicators.
- 2.2.9 The Bilateral Hub shall automate notifications on behalf of Trading Parties for both HVI and LVI. When using the HVI, “.M” notifications shall be sent to all Affected Trading Parties associated with a specific Request in accordance with CSD 0601 (Bilateral Data Catalogue).
- 2.2.10 The Wholesaler may provide information to the Retailer through its own information portal where the relevant process is not available through the Bilateral Hub.
- 2.2.11 Any requirement on the Retailer or the Wholesaler to disclose information or data to the other shall not apply if such information or data constitutes sensitive personal data, as such term is defined in the Data Protection Act 2018.
- 2.2.12 Where the use of Forms is required under any process, the Retailer shall submit the information required in these Operational Terms as set out in the relevant Form

contained in Schedule 1 Part 6 (Forms and Notices). This includes when submitting any updates to the information requested in the Forms.

2.2.13 The format of the Forms contained in Schedule 1 Part 6 (Forms and Notices) of this Wholesale Contract represents the word version of the Forms. For operational reasons, the Wholesaler may also use excel versions of the Forms where the use of Forms is required under any process, so long as the items of information requested are as set out in Schedule 1 Part 6 (Forms and Notices). Additionally the Wholesaler may use other suitable formats for requesting information, including electronic formats, only requesting the information as set out in Schedule 1 Part 6 (Forms and Notices).

2.2.14 Unless these Operational Terms provide otherwise, a Request shall be considered "materially complete" if all applicable mandatory information has been completed on the Request. Each Request identifies the applicable mandatory information. In submitting or responding to any Request within the Bilateral Hub, the Requestor or Responder shall make the submission on the basis that any information provided is correct to the best of its knowledge and up to date at the time of submission.

2.2.15 Any notice, notification, Request or other written communication given under these Operational Terms shall be treated as having been received as set out below, unless otherwise expressly stated, including in any other Law or it can be shown that receipt actually occurred on a different day (and subject to adjustment for the particular cases described further below):

- (a) where the relevant notice period is expressed in terms of Business Days:
 - (i) if delivered by hand (including courier) during Delivery Hours, when so delivered; and if delivered by hand outside Delivery Hours, at the next start of Delivery Hours;
 - (ii) if sent by first class pre-paid post, guaranteed next day delivery, post with delivery confirmation or receipt (for example special delivery), on the later of actual receipt and 9.00 am on the Business Day after posting if posted on a Business Day, and on the later of actual receipt and 9.00 am on the second Business Day after posting if not posted on a Business Day;

- (iii) if sent by first class pre-paid post, without a guaranteed delivery date, on the third Business Day after posting if posted on a Business Day, and on the fourth Business Day after posting if not posted on a Business Day; and
 - (iv) if sent by e-mail or any other electronic means during a Business Day, on that Business Day and if it is received outside of a Business Day, on the following Business Day; and
- (a) where the relevant notice period is expressed in calendar days or in hours:
- (i) if delivered by hand (including courier), when so delivered;
 - (ii) if sent by first class pre-paid, guaranteed next day delivery, post with delivery confirmation or receipt (for example special delivery), on the earlier of actual receipt and 9:00am on the Business Day after posting if posted on a Business Day, and on the earlier of actual receipt and 9:00am on the second Business Day after posting if not posted on a Business Day;
 - (iii) if sent by first class pre-paid post, without a guaranteed delivery date, on the third Business Day after posting if posted on a Business Day, and on the fourth Business Day after posting if not posted on a Business Day; and
 - (iv) if sent by e-mail or any other electronic means, when received by the recipient's receiving equipment.

2.2.16 These principles and time periods will apply to any notice, notification, Request or other written communication or document which must be given by the Wholesaler to the Retailer, or by the Retailer to the Wholesaler, or by either the Wholesaler or the Retailer to any Non-Household Customer, under these Operational Terms. However, these principles and time periods do not apply to any notice, notification, Request or other written communication or document or other data or information to be provided to the Market Operator, which will instead be determined by the Market Terms.

2.2.17 For any notice, notification, Request or other written communication or document under these Operational Terms which must be served on the Wholesaler, including

any statutory notices or other Forms, notices or notifications which require a signed declaration by the Retailer or Non-Household Customer, the notice, notification, Form or other communication or document must be provided in hard copy original format (not by e-mail or any other electronic means or format). The Wholesaler must notify the Retailer of where the Wholesaler shall accept service of those notices, notifications, Requests or other communications or documents.

2.2.18 For any notice or notification to be given by the Wholesaler to the Retailer under part D (Planned activities and affected services) or part E (Unplanned events and incidents), such notice or notification may be given by the Wholesaler making available the required information on a portal or other electronic interface to which the Retailer has access, in which case the notice or notification shall be treated as having been given by the Wholesaler, and received by the Retailer, at the time that notice or notification is made available on that portal or other electronic interface.

2.2.19 For any notice or notification to be given by the Wholesaler to a Non-Household Customer under part D (Planned activities and affected services), such notice or notification may alternatively be given by the Wholesaler by other appropriate means, which may include:

(b) direct notification by electronic means, in which case such notice or notification will be given by the Wholesaler, and received by the Non-Household Customer, at the time it is received by the Non-Household Customer's receiving equipment; or

(c) where appropriate, by publishing the required information in or on public media or otherwise making the required information publicly available, in which case such notice or notification will be given by the Wholesaler, and received by the Non-Household Customer, at the time that it is published or otherwise made publicly available by the Wholesaler.

2.2.20 Unless otherwise specified, where a notice or notification, Request or other written communication must be given in advance of an event or act, the period of time shall be calculated as beginning on the Business Day or calendar day (as applicable) before the event or act is due to occur.

2.2.21 The Wholesaler shall use reasonable endeavours to acknowledge receipt of any notice or notification, Request or other written communication or document which is given by the Retailer to the Wholesaler, under these Operational Terms.

2.3 Publication of Wholesaler's Network Area

2.3.1 It may not always be clear in which Area an Eligible Premises is located or from which Wholesaler's Network it is supplied. To help the Retailer identify whether a Request should be submitted to the Wholesaler (for example, a request in respect of a Gap Site), the Wholesaler shall publish a map or other appropriate information such as grid references, for example, British National Grid (metres) or polygon references, showing the boundary line in a commonly agreed GIS format, which would enable the Retailer to identify the Area served by the Wholesaler's Network. In particular, such references should identify the boundary between the Area served by the Wholesaler and that served by an adjoining Wholesaler or Wholesalers. The Wholesaler must also keep that map and references updated and make it available to all Retailers.

2.3.2 If the Wholesaler receives a Request from the Retailer in relation to an Eligible Premises which is not within its Area or not served by its Network, then it shall tell the Retailer so, explaining why and, where possible, saying which Wholesaler's Area or Network they consider is serving the Eligible Premises. The Wholesaler shall do so within five (5) Business Days of its receipt of the Retailer's Request unless an alternative timescale is set out within the relevant process.

2.3.3 If the Wholesaler considers the Eligible Premises to be within its Area or served by its Network then it shall proceed to provide the Wholesale Service as set out in the relevant process.

2.4 Customer relationship

2.4.1 These Operational Terms reflect the principle that the Retailer owns its relationship with its Non-Household Customers and that Water Services and/or Sewerage Services are provided to Non-Household Customers through a Retailer. The Retailer is the primary point of contact for its Non-Household Customers except in cases of Wholesaler planned activities and unplanned events or incidents.

- 2.4.2 These Operational Terms also recognise that the Wholesaler retains various statutory and other obligations that may require it to engage directly with Non-Household Customers from time to time.
- 2.4.3 Trading Parties shall inform their customers that in raising a Request, information may be shared with any Affected Trading Parties as necessary during the completion of this Request and that any Affected Trading Parties may contact their customers to process the Request.
- 2.4.4 The arrangements for the Retailer notifying the Wholesaler, and for the Wholesaler notifying the Retailer, of any unplanned change in Water Services and/or Sewerage Services are set out in part E (Unplanned events and incidents), as are the arrangements for providing customers, including Non-Household Customers, with information about those unplanned changes.
- 2.4.5 The arrangements for the Wholesaler notifying the Retailer and its Non-Household Customers about planned activities which may affect Water Services and/or Sewerage Services are set out in part D (Planned activities and affected services) of these Operational Terms.
- 2.4.6 Nothing in these Operational Terms requires the Wholesaler to exclude Non-Household Customers from any general awareness campaigns (for example, media campaigns).
- 2.4.7 Nothing in these Operational Terms shall prevent the Wholesaler from exercising statutory powers of investigation or enforcement (including serving statutory notices) or accepting service of any statutory notice directly from any Non-Household Customer.
- 2.4.8 The various processes in these Operational Terms have been designed to support clear and effective communications with Non-Household Customers. Each process that may require the Wholesaler to engage directly with a Non-Household Customer sets out particular steps that the Wholesaler and the Retailer shall take to enable that contact.
- 2.4.9 The Business Terms provide for adherence to the Guaranteed Service Standards and payments resulting from a failure to meet them.

2.5 Service Level Agreements and out-of-hours services

2.5.1 These Operational Terms set out SLAs within which the Wholesaler and the Retailer shall be required to complete relevant process steps.

2.5.2 These SLAs represent the minimum levels of service and, where possible, the Wholesaler and the Retailer should each seek to improve on these SLAs for the benefit of Non-Household Customers. Where the relevant process is available via the Bilateral Hub, any stated SLA shall not apply for the period of the Deferral to either the Wholesaler or the Retailer once the Wholesaler has opted to defer a Request in accordance with OSD 0701 (Bilateral Common Processes). The reasons to defer a Request within the Bilateral Hub include:

- (a) The Non-Household Customer is unavailable in the period of the SLA.
- (b) The Retailer is unavailable in the period of the SLA.
- (c) Third party involvement applies (for example, awaiting completion of enabling works).
- (d) Third party/agency consents are required (for example, with regard to private land access, highway authority notices, or Environment Agency liaison over trade effluent consents).
- (e) Other regulatory constraints are required (for example, with regard to water quality activity including water quality sampling, or contraventions of the Water Supply (Water Fittings) Regulations 1999).
- (f) Extreme weather applies (for example, with regard to where snow, flooding or drought has impacted infrastructure and/or operations).
- (g) A Force Majeure Event applies.
- (h) Further information is required from the Retailer to proceed.
- (i) A bespoke agreement was agreed to submit low impacting Requests in bulk

2.5.3 Where the relevant process is not available via the Bilateral Hub, any stated SLA shall not apply for the period of the Deferral to either the Wholesaler or the Retailer where:

- (a) at the request of a Non-Household Customer, they have agreed a different timescale for an action to be completed. This may apply, for example, in the case of metering work, where the Retailer's Non-Household Customer wishes another date for the work to be arranged. In this case the Wholesaler or Retailer must meet the alternative agreed date or timescale; or
- (b) where the Wholesaler has not received a necessary third party consent to allow it to complete the work, provided it has sought any such consent expeditiously. In this case the Wholesaler must complete the work as soon as practicable after receiving the consent.

2.5.4 In recording its performance in such cases where the relevant process is not available via the Bilateral Hub the Wholesaler shall identify the reason for the delay compared to the requirements set out in these processes.

2.5.5 On occasion it may not be possible for the Wholesaler or Retailer to meet the stated timescale due to extreme weather and, in such cases where the relevant process is not available via the Bilateral Hub, the reason for the delay should also be appropriately recorded.

2.5.6 The principle requirements for SLAs are as follows:

- (a) Each SLA shall have a defined Start Trigger which when reached shall start the timer for that specific SLA.
- (b) Each SLA shall have a defined End Trigger (or list of End Triggers) which when reached shall end the timer for that specific SLA.
- (c) SLAs are defined and counted in Business Days unless there is a specific reason why calendar days have to be cited.
- (d) SLAs shall be paused in the event of a Deferral.
- (e) SLAs may be prematurely stopped in the event of a Request being rejected.
- (f) Resubmission of a Request shall trigger a new SLA (where appropriate).

2.5.7 If, by virtue of an action carried out by a Trading Party, a Start Trigger would fall during a Business Day (between 08:00 and 18:00), that day shall be counted as day zero and

the immediately following Business Day shall be counted as day 1 for the purpose of the SLA. If, by virtue of an action carried out by a Trading Party, a Start Trigger would fall outside of a Business Day (after 18:00 and before 08:00), the immediately following Business Day shall be counted as day zero for the purpose of the SLA.

2.5.8 If an End Trigger (or list of End Triggers) falls during a Business Day (between 08:00 and 18:00), that day shall be counted as the final day for the purpose of the SLA. If an End Trigger (or list of End Triggers) falls outside of a Business Day (after 18:00 and before 08:00), the next Business Day should be counted as the final day for the purpose of the SLA.

2.5.9 Throughout these Operational Terms, it is assumed that work shall be carried out during the Business Day. However the Wholesaler may offer an out-of-hours service to allow work to be carried out in the evening or over a weekend and, if included within its Wholesale Tariff Document, may charge an additional Wholesale Charge for that service.

2.6 Non-Household Customer Transfers whilst there is an Outstanding Service Request (including on exit)

2.6.1 A Non-Household Customer may Transfer between Retailers where there is an Outstanding Service Request between the Outgoing Retailer and the Wholesaler (e.g. application for a meter to be exchanged or a modification of a Trade Effluent Consent).

2.6.2 Any Outstanding Service Request that was raised through the Bilateral Hub prior to a Transfer carried out under CSD 0102 (Registration: Transfers), CSD 0003 (Volume Transfer and Volume Data Update), or CSD 0004 (Interim Supply Process) shall be Transferred through the Bilateral Hub with effect from the date stipulated in the applicable CSD, with notifications being sent to the relevant Trading Parties also in accordance with the individual processes set out in the applicable CSD.

2.6.3 Following the Transfer, the Incoming Retailer shall be able to view and access the ORID Data in respect of any Outstanding Service Request relating to the Transferred Supply Point. The Incoming Retailer shall also be able to view a list of all Requests relating to the Transferred Supply Point that has been closed or cancelled within the preceding twelve (12) Months, but the accessible ORID Data shall be limited beyond

sight of the ORID (D8221), the SPID (D2001), the Request process type, Request Status (D8223) and the date the Request was raised.

- 2.6.4 Following the Transfer, the Outgoing Retailer shall only be able to view and access the ORID Data in respect of any Request relating to the Transferred Supply Point that has been closed or cancelled prior to the Transfer.
- 2.6.5 Following the Transfer, the Wholesaler and the Incoming Retailer shall continue with the relevant process unless the relevant process involves outstanding payment which is required from the Outgoing Retailer, in which case the Request may be cancelled by the Wholesaler (if the Request was initiated by the Wholesaler) or the Incoming Retailer (if the Request was initiated by the Outgoing Retailer).
- 2.6.6 In all other circumstances where the Outstanding Service Request does not relate to a Request raised within the Bilateral Hub, the following paragraphs 2.6.7 to 2.6.9 shall apply as appropriate.
- 2.6.7 If the Wholesaler is informed by the Market Operator that the Retailer has submitted a Transfer Registration Application or indicated an Erroneous Transfer (i.e. where the Retailer is an Incoming Retailer), the Wholesaler shall inform the Retailer of any Outstanding Service Requests in respect of the Supply Point(s) which is the subject of the Transfer Registration Application or the rectification of an Erroneous Transfer as well as the step reached in such processes. The Wholesaler and the Incoming Retailer shall continue with the relevant process unless the relevant process involves outstanding payment which is required from the Outgoing Retailer, in which case the Outstanding Service Request may be cancelled. Where the Retailer is an Outgoing Retailer, the Wholesaler shall also notify both it and the Incoming Retailer of the outcome of any Outstanding Service Requests on their completion.
- 2.6.8 If a Transferor chooses to exercise its right to exit pursuant to the Exit Regulations, the Transferor shall inform the Transferee of any Outstanding Service Request(s) in respect of the Affected Supply Point(s) as well as the step(s) reached in dealing with such Outstanding Service Request(s) and the Transferor and the Transferee shall continue with the relevant process under these Operational Terms as if the Retailer had been Registered to the relevant Supply Point(s) from the commencement of that process.

2.6.9 In the case of an exit the Transferor shall, in particular, inform the Transferee of any complaints made by any Non-Household Customer(s) which have been referred to the Transferor under process F5, or otherwise, which remain outstanding at the Exit Date, and the step(s) reached in that process. In addition, the Transferor in its capacity as the Undertaker shall also inform the Transferee of any complaints made to it by any Non-Household Customer(s), which are outstanding at the Exit Date. The Transferee shall be responsible for dealing with those complaints, with effect from the Exit Date, as if anything done by or in relation to the Transferor in connection with those complaints prior to that date had been done by or in relation to the Transferee. The Wholesaler shall continue any dialogue / activity agreed with the Transferee as if they were the Transferor immediately before the transfer.

3 Use of Accredited Entities to undertake activities

3.1 Accreditation schemes

3.1.1 Wholesalers may operate a number of accreditation schemes which authorise qualified entities to perform certain activities in relation to the Wholesaler's Network, such as the schemes currently in operation. Many of these schemes have no impact on the Competitive Market.

3.1.2 There are, however, some schemes which allow Accredited Entities to undertake work referenced in these processes as an alternative to the Wholesaler undertaking the work. For example, the Water Industry Registration Scheme (WIRS) administered by Lloyd's Register allowing WIRS Providers (or equivalent) to undertake defined activities, or any other arrangements the Wholesaler may establish with other appropriate parties.

3.1.3 The processes in these Operational Terms set out the operational steps and timescales which would apply in cases where the Wholesaler has established such accreditation arrangements. The obligations which shall apply to the Retailer when it wishes to use an Accredited Entity are set out below and in the Business Terms.

3.1.4 The provision for accreditation arrangements in these Operational Terms does not require the Wholesaler to establish or subscribe to such accreditation schemes. The processes and obligations in respect of Accredited Entities shall only apply where the

Wholesaler has subscribed to or established an accreditation scheme covering those activities.

3.2 Wholesaler Information about Accreditation Schemes

- 3.2.1 To the extent the Wholesaler operates any accreditation scheme, the Wholesaler shall set out the detail of how such entities become accredited and how the scheme shall operate. The accreditation scheme itself shall contain all the relevant information relating to the scope of the work that Accredited Entities are authorised to undertake, including, for example, responsibilities, relevant standards, materials and training. The Wholesaler's accreditation arrangements may also include, for example, any bi-lateral contract or arrangement between the Wholesaler and the Accredited Entity, which may be used to set out details of their respective duties, liabilities, indemnities and dispute resolution procedures.
- 3.2.2 To the extent that the Wholesaler is operating an accreditation scheme to allow any of the activities set out in these Operational Terms to be undertaken by Accredited Entities, if there are documents and accreditation documentation which it has generated and which are not in the public domain, the Wholesaler shall ensure that an up-to-date copy is made available to the Retailer or references are provided such that the Retailer may obtain copyright material directly from the publisher.
- 3.2.3 Additionally, the Wholesaler shall notify the Retailer in writing when there is a change in its accreditation scheme requirements.

3.3 Using an Accredited Entity

- 3.3.1 These Operational Terms set out the processes which the Wholesaler and the Retailer shall follow where all the necessary arrangements are in place and the Retailer chooses to use an Accredited Entity rather than the Wholesaler to perform certain activities.
- 3.3.2 Under these Operational Terms, when the Retailer instructs an Accredited Entity, the Retailer is required to:
- (a) ensure that it instructs Accredited Entities to undertake activities only in respect of Supply Points to which it is Registered under the Market Terms;

- (b) ensure that it uses only entities accredited for the relevant works or associated works and to do nothing which would cause the Accredited Entity to breach the requirements of the accreditation scheme, including but not limited to all regulatory and procedural requirements regarding advance notification to, and public communication with, premises whose supply may be affected, and to operate in a manner which is not injurious to the health and safety of any persons impacted by their works;
- (c) provide any advance notice of Accredited Entity work affecting the Wholesaler's Network set out in these Operational Terms;
- (d) ensure that all instructions to the Accredited Entity (in particular Non-Household Customer addresses) are accurate in all material aspects and ensure that any conditions or stipulations applied by the Wholesaler in relation to the activity are forwarded in full and unaltered to the Accredited Entity;
- (e) other than where performing a Disconnection for non-payment by the Non-Household Customer, ensure that it obtains the authority, agreement and consent of any owner or occupier of any Eligible Premises in relation to the carrying out of all relevant works or associated works;
- (f) if requested by the Wholesaler, ensure that it provides the Wholesaler with a quarterly forecast containing a reasonable estimate of the nature and extent of the work it intends to request the Wholesaler to provide during the course of each financial year and a reasonable estimate of the work it intends to instruct an Accredited Entity to do and, if so requested, discuss the same with the Wholesaler. Forecasts are to be received by the Wholesaler quarterly, on a cycle to be agreed between the Wholesaler and the Retailer. The provision or non-provision of any forecast shall not relieve the Wholesaler from any obligation to provide Wholesale Services under the Wholesale Contract;
- (g) provide the Wholesaler with all the data it requires to meet its obligations under the Market Terms and these Operational Terms in relation to the carrying out of such activities, notwithstanding any obligation placed directly on the Retailer to provide data under these documents;

- (h) not to act, or purport to act, as an agent of the Wholesaler or to bind the Wholesaler in any way in its dealings with the Accredited Entity, the relevant Non-Household Customer or other persons;
- (i) where the associated works have been undertaken within a Non-Household Customer's premises, liaise with the Non-Household Customer and the Accredited Entity as necessary, to enable the Wholesaler and/or the body responsible for the management of the accreditation scheme to gain access to the works for the purposes of carrying out investigations or as part of an accreditation assessment;
- (j) instruct the Accredited Entity to carry out corrective work at an Eligible Premises upon the Wholesaler's written notification, where incorrect work has been undertaken which has been caused by the Retailer issuing inaccurate or incorrect instructions to the Accredited Entity;
- (k) suspend all instructions to the Accredited Entity where: the Accredited Entity is not carrying out the work in accordance with accreditation requirements; or the Wholesaler gives notification in writing that the associated Network is suffering from an unplanned interruption; or the Wholesaler believes the work is creating, or is likely to create, a significant public health risk, risk to water quality or a significant risk of damage or failure to the Network; and
- (l) provide information to the Drinking Water Inspectorate, Wholesalers acting in a regulatory capacity under relevant statutory provisions or other Relevant Authority where requested.

4 Wholesale Charges, requesting Wholesale services, and service of statutory notices

4.1 Wholesale Tariff Document and non-standard Wholesale Charges

- 4.1.1 Should the Wholesaler wish to charge the Retailer, or make any payment to it, in respect of any of the Wholesale Services it provides under these Operational Terms, then such Non-Primary Charges or payments must be set out within its Wholesale Tariff Document, consistent with the Business Terms. This includes the basis on which the Wholesaler shall charge for any non-standard work.

4.1.2 The Wholesaler's Wholesale Tariff Document shall contain details of:

- (a) any incentive or contribution payment schemes which it chooses to operate;
- (b) any payments which it will make in connection with work performed by Accredited Entities; and/or
- (c) any charges or payments for particular models of meter which it supports.

4.1.3 The processes in these Operational Terms may also lead to allowances and adjustments being made to Primary Charges. As set out in the Business Terms, the Wholesale Tariff Document shall also contain details of any such allowances or adjustments. This shall include, for example, any policy which the Wholesaler has on the frequency with which its operational parameters are updated in respect of a change in strength of Trade Effluent discharged into its Network. The Market Terms and Code Subsidiary Documents set out how Primary Charges, including any allowance or adjustment, will be calculated and settled through the Central Systems.

4.1.4 If there is a non-standard charge for any Wholesale Service, the Retailer must confirm its acceptance of any quotation that the Wholesaler has provided before it is required to pay that non-standard Wholesale Charge and before the Wholesaler is required to provide the non-standard Wholesale Service.

4.2 Requesting Wholesale Services

4.2.1 Wherever required by a process the Retailer must use the Bilateral Hub, or where not available the relevant Form from Schedule 1 Part 6 (Forms and Notices) of this Wholesale Contract, to ask the Wholesaler to perform one of the Wholesale Services set out within these Operational Terms.

4.2.2 By submitting that Request, the Retailer accepts that it shall pay the Wholesaler any standard charge for that Wholesale Service which is set out within the Wholesale Tariff Document. The Wholesaler may, therefore, proceed to perform the Wholesale Service without delay, for example installing a meter on its initial site visit.

4.3 Statutory notices

4.3.1 If a Non-Household Customer serves or otherwise properly provides the Wholesaler with a notice under the Water Industry Act 1991, or other statute, which results in the

Wholesaler providing the equivalent of a Wholesale Service directly to that Non-Household Customer (for example, approving an application for a Trade Effluent Consent under section 119 or a connection notice under section 45 of the Water Industry Act 1991), and the Retailer is Registered to the relevant Supply Point in respect of that Non-Household Customer's Eligible Premises, the Wholesaler shall notify the Retailer that it has received the notice within **two (2)** Business Days of its receipt.

- 4.3.2 The Retailer shall be liable to the Wholesaler for any applicable Primary Charges or Non-Primary Charges set out within or in accordance with the Wholesale Tariff Document. In such cases the Wholesaler agrees that it shall not also seek to impose any equivalent charge directly on the Non-Household Customer.
- 4.3.3 Any payment to be made for any failure by the Wholesaler to comply with a Guaranteed Service Standard, and any payments to be made by the Wholesaler in respect of any Drought Order, are addressed in section 2.4 (Service Standards) of the Business Terms.

5 List of Operational Subsidiary Documents

OSD 0701: Bilateral Common Processes
OSD 0702: Bilateral Processes for Part A – New connections
OSD 0703: Bilateral Processes for Part B - Metering
OSD 0704: Bilateral Processes for Part C – Confirmation and verification of supply arrangements
OSD 0705: Bilateral Processes for Part D – Planned activities and affected services
OSD 0706: Bilateral Processes for Part E – Unplanned events and incidents
OSD 0707: Bilateral Processes for Part F – Monitoring, investigations, complaints and enquiries
OSD 0708: Bilateral Processes for Part G – Trade Effluent
OSD 0709: Bilateral Processes for Part H – Allowances, Volumetric Adjustments, assessment requests and applications
OSD 0710: Bilateral Processes for Part I – Disconnections & Reconnections
OSD 0711: Bilateral Processes for Part J – Accredited Entity performed activity

Part A: New connections

A. General introduction and application of this part A to new connections activity

A range of different activities are involved in the provision of developer services leading to the making of new water and sewerage connections.

This part A (New connections) applies only to the making of new connections to Eligible Premises that the Retailer will be supplying with water and/or sewerage services once the connection has been made. A Non-Household Customer may appoint the Retailer to provide the Water Services and/or Sewerage Services only upon the connection being made. In this case the Retailer will need to be appointed upon the connection being made, so that the Market Operator can Register the Supply Point to that Retailer. The Wholesaler and Retailer shall follow Process A1 to ensure that the Retailer is Registered to the newly connected Supply Point in accordance with the Market Terms.

The process within this part A (New connections) is:

Number	Process
A1	Application to be Registered as the Retailer to a newly connected Supply Point where it has agreed to supply water and/or sewerage services after the connection has been made and so should be Registered to the new Supply Point

The Wholesaler and Retailer shall follow Process A1 for any new connection to the Eligible Premises of the Retailer's Non-Household Customer. This will include new connections to both new and existing Eligible Premises, at either greenfield sites or brownfield sites. At the end of the process the Wholesaler will either request new Water Services and/or Sewerage Services SPID(s) from the Market Operator or update the information held about an existing Supply Point to show, for example, any new meter which has been installed.

The Wholesaler and Retailer shall also apply Process A1 in respect of a new connection for Building Water in the same way as for any other connection. This will include Building Water for the construction of premises which will ultimately become either Eligible Premises or other premises, including Household Premises, or a combination of both. In any event, any New Supply Point having Building Water will be Registered in accordance with the Market Terms.

B. Pairing of connections requiring New Supply Points and notifications between the Wholesaler and Market Operator

Before a new water connection is made to an Eligible Premises which is not currently Registered as having a corresponding Water Services Supply Point (or a new sewerage connection is made with no corresponding Sewerage Services Supply Point), the Wholesaler shall issue a request to the Market Operator for the Registration of a New Supply Point, as set out in this part A (New connections) and in accordance with the Market Terms. This will include providing the information necessary to support pairing of the Water Services Supply Point and Sewerage Services Supply Point in respect of an Eligible Premises.

C. Use of this part A for the making of a new connection and for Registration with the Market Operator

The Wholesaler must inform the Market Operator of every new connection made. Where this requires a New Supply Point, it must inform the Market Operator of any Retailer selected by the Non-Household Customer, which is to be Registered to that New Supply Point.

If the Retailer's Non-Household Customer intends for the Retailer to provide only the Water Retail Services and/or Sewerage Retail Services once the connection has been made, then the Retailer and the Wholesaler shall follow Process A1.

Process A1 – Application to be Registered as the Retailer to a newly connected Supply Point

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the A1 process steps set out in OSD 0702 (Bilateral Processes for Part A: New connections).

Part B: Metering

A. General introduction

Part B (Metering) sets out the processes which the Wholesaler and the Retailer shall follow in relation to installation, accuracy testing, fault and repair, and change of meters owned by the Wholesaler, and Retailer requests for Meter Reads for Non-Market Meters in certain circumstances. In applying the processes under this part B (Metering), references to “meter” may be construed to include any related Wholesaler owned meter and meter chamber assets where applicable.

This part B (Metering) also includes processes which the Wholesaler and the Retailer shall follow in relation to Private Meters which are not owned by the Wholesaler and which are necessary for the calculation of Primary Charges for Trade Effluent Services, or for Trade Effluent Services and Foul Sewerage Services and in relation to Cross Border Meters which are necessary for the calculation of Primary Charges for Sewerage Services.

Processes B1 to B7 apply only in relation to meters provided by the Wholesaler. Process B11 applies only in relation to Non-Market Meters which are in a Meter Network at a Supply Point. Process B12 (merged) applies only in relation to Private Meters which are not owned by the Wholesaler but which are necessary for the calculation of Primary Charges for Trade Effluent Services, or for Trade Effluent Services and Foul Sewerage Services, or to Cross Border Meters which are necessary for the calculation of Primary Charges for Sewerage Services.

B. Meters available

The Wholesaler shall publish a list of the models of meters it provides, including their technical characteristics and keep that list up-to-date. The Wholesaler shall seek views of the Retailer from time to time but at least once each year when creating or updating that list in accordance with the Business Terms. The Retailer may ask the Wholesaler to supply particular functionality in its meters and the Wholesaler shall consider such requests in compiling its list of meters.

In compiling its list of meters, the Wholesaler is urged to give consideration to having on its list meters which are compatible with the fitting of data logging devices (or similar devices for data capture and transmission) for the supply in question (unless the Wholesaler supplies meters with integrated data logging capabilities). The provisions dealing with the installation

of external logging (or similar) devices on meters and the provisions for sharing of information from logging (or similar) devices, whether externally fitted or integral to the meter, are set out in the Business Terms.

The Retailer may choose from the Wholesaler's list of meters when it requests the installation or replacement of a meter to the extent their choice is suitable for the supply in question.

Where the Wholesaler initiates an installation or replacement of a meter, it shall confer with the Retailer with regard to its proposals for the meter or meters to be installed. The Retailer shall indicate the model of meter it proposes to be installed via a B1, B5 or B7 Request (as applicable) or via a J1 and/or J2 Request if using an Accredited Entity.

C. Metering timescales

Metering work shall be carried out within the timescales in the processes set out below other than where one of the circumstances listed under heading E (Timescales, out-of-hours services and performance monitoring) of the Introductory part of these Operational Terms applies. For example, where an alternative date is agreed between the Retailer and the Wholesaler following a Non-Household Customer request, the Wholesaler and/or Retailer shall carry out their respective steps in order to meet that alternative date.

The Wholesaler shall follow the applicable processes set out in part D (Planned activities and affected services) to ensure that the Retailer and any other Retailer whose Non-Household Customer may be affected by the metering work is aware of when the work shall take place and can inform its Non-Household Customers.

D. Data loggers (or similar devices for data capture and transmission) fitted on meters

Where any data logger (or similar device for data capture and transmission) is attached to a meter on which metering work is to be carried out by the Wholesaler and the data logger (or similar device) has not been installed by the Wholesaler, the Retailer shall make reasonable endeavours to arrange with its Non-Household Customer or other owner of such equipment to ensure that it is removed in advance of the Wholesaler carrying out the metering work.

If it is not removed in advance of the Wholesaler visiting the Eligible Premises to perform the work, the Wholesaler may remove it in accordance with its policy in relation to the fitting of data loggers (or similar devices) on its meters, in place from time to time.

On completion of the work the Wholesaler shall use reasonable endeavours to re-install the data logger (or similar device) to the repaired or replacement meter (provided the meter installed is compatible with the use of that data logger or similar device).

E. Standard and non-standard metering work

Throughout these processes, references to ‘standard’ metering work includes that work which is charged by reference to a specified standard price within the Wholesale Tariff Document. References to ‘non-standard’ metering work includes metering work for which the Wholesaler’s Wholesale Tariff Document sets out a price point other than the standard price or it provides for a quotation for the work to be done. If the metering work is non-standard, the Retailer must confirm acceptance of any quotation or non-standard charge before it is required to pay that non-standard Wholesale Charge.

F. Overview of metering processes

Table 1: Overview of metering processes

Number	Process
B1	Installation of a meter performed by the Wholesaler
B2	Installation of a meter performed by an Accredited Entity [no longer in use, moved under processes J1 and J2]
B3	Meter accuracy test performed by the Wholesaler
B4	Meter accuracy test performed by an Accredited Entity [no longer in use, moved under processes J1 and J2]
B5	Repair or replacement of a faulty meter performed by the Wholesaler
B6	Repair or replacement of a faulty meter performed by an Accredited Entity [no longer in use, moved under processes J1 and J2]
B7	Change to size, model or location of meter performed by the Wholesaler (other than a replacement following a fault)
B8	Retailer requested change to size or location of meter performed by an Accredited Entity (other than a replacement following a fault) [no longer in use, moved under processes J1 and J2]
B9	Retailer requested change of model of meter performed by an Accredited Entity (other than a replacement following a fault) [no longer in use, moved under processes J1 and J2]

Number	Process
B10	Wholesaler requested installation of a meter or change to the size, model or location of meter performed by the Wholesaler (other than a replacement following a fault)
B11	Retailer request for Wholesaler to carry out a Meter Read for a Non-Market Meter relating to a Transfer or allocation of a Supply Point
B12 (merged)	Request relating to Private Meter or Cross Border Meter
B13	Testing, repairing and replacing Private Meters necessary for calculation of Primary Charges for Trade Effluent Services, or Trade Effluent Services and Foul Sewerage Services [no longer in use, merged with B12 (merged)]
B14	Exchanging Private Meters necessary for calculation of Primary Charges for Trade Effluent Services, or Trade Effluent Services and Foul Sewerage Services [no longer in use, merged with B12 (merged)]
B15	Installing Cross Border Meters necessary for the calculation of Primary Charges for Sewerage Services [no longer in use, merged with B12 (merged)]
B16	Testing, repairing and replacing Cross Border Meters necessary for the calculation of Primary Charges for Sewerage Services [no longer in use, merged with B12 (merged)]
B17	Exchanging Cross Border Meters necessary for the calculation of Primary Charges for Sewerage Services [no longer in use, merged with B12 (merged)]

G. Installing a meter

Purpose and scope of Process B1:

The installation of a meter at or in respect of an Eligible Premises is the responsibility of the Wholesaler, as is the sizing and location of the meter. This process sets out the operational arrangements which apply where:

- the Retailer initiates the request and the Retailer requests the Wholesaler to carry out the meter installation work.
- the Retailer initiates the request and wishes to carry out the meter installation work using an Accredited Entity, it shall follow Processes J1 and/or J2 as applicable.

This process applies to the installation of meters at Eligible Premises where no meter is currently installed, including:

- where the Water and/or Sewerage Services received are currently Unmeasured or Assessed, including following an Assessment Request under Process H3; or
- following agreement of a Contribution Offer under this Process B1.

This process does not apply to meters which are installed in relation to new connections or Gap Sites, which are dealt with under Processes C2 and C3 in part C (Confirmation and verification of supply arrangements).

Process B1 – Installation of a meter performed by the Wholesaler

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the B1 process steps set out in OSD 0703 (Bilateral Processes for Part B: Metering).

Process B2 – Installation of a meter performed by an Accredited Entity

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the provisions set out under Part J of these Operational Terms as well as the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the J1 and/or J2 process steps set out in OSD 0711 (Bilateral Processes for Part J: Accredited Entity performed activity).

Meter accuracy

Purpose and scope of Process B3:

Testing the accuracy of an installed meter is the Wholesaler's responsibility. These processes set out the operational arrangements which apply where the Wholesaler is a Water Wholesaler and either:

- the Wholesaler is to arrange for a meter accuracy test to be performed where either:
 - it wishes the meter accuracy test to be performed; or
 - it has received a request from the Retailer, any Other Retailer or any Other Wholesaler; or

- it has been asked to do so by an arbitration tribunal or Disputes Committee (Process B3)

If the Retailer is a Water Retailer and wishes a meter accuracy test to be performed by an Accredited Entity, it shall follow Processes J1 and/or J2 as applicable.

Where the meter is tested it will normally be removed and replaced with a new meter to allow the testing to take place. There may be cases where the test can be carried out in situ and in those cases, such as where a configuration leading to an inaccurate reading is confirmed, the Wholesaler shall take such steps to rectify the situation as is needed, such that the meter shall be able to make an accurate record of the consumption of water. However, in all other cases, where the meter is removed to be tested, a replacement meter must be installed on the same day that the meter to be tested is removed and will normally be the same physical size and location as the removed meter. There may be cases where the meter is incorrectly sized, leading to an incorrect reading, in which case any request by the Retailer for a replacement meter will be dealt with in accordance with Processes B7 or J1 and/or J2.

Wherever a meter accuracy test conducted under these processes shows that a meter has been recording inaccurately, the Wholesaler shall notify the Market Operator of any Volumetric Adjustment in accordance with the Market Terms.

Process B3 – Meter accuracy test performed by the Wholesaler

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the B3 process steps set out in OSD 0703 (Bilateral Processes for Part B: Metering).

Process B4 – Meter accuracy test performed by an Accredited Entity

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the provisions set out under Part J of these Operational Terms as well as the Common

Processes set out in OSD 0701 (Bilateral Common Processes) and the J1 and/or J2 process steps set out in OSD 0711 (Bilateral Processes for Part J: Accredited Entity performed activity).

H. Fault and repair

Purpose and scope of Process B5:

The repair or replacement of faulty meters (including any meter chambers, lids or frames, etc.) is the Wholesaler's responsibility. This process sets out the operational arrangements which apply where the Retailer notifies the Wholesaler that a meter installed at an Eligible Premises is faulty or where the Wholesaler identifies a faulty meter, in which case the Wholesaler shall carry out the repair or replacement of the meter.

Where the Retailer identifies a meter fault it may either:

- request the Wholesaler to carry out the repair or replacement of the meter (Process B5);
or
- carry out the repair or replacement of the meter using an Accredited Entity (Processes J1 and/or J2).

Where the meter is replaced under this Process B5, the physical size and location of the installed meter must be the same as the physical size and location of the removed meter. If the size or location of the meter caused the fault, Processes B7 or J1 and/or J2 (which relate to changes to the physical size or location of the meter) should be followed.

Process B5 – Repair or replacement of a faulty meter performed by the Wholesaler

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the B5 process steps set out in OSD 0703 (Bilateral Processes for Part B: Metering).

Process B6 – Repair or replacement of a faulty meter performed by an Accredited Entity

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the provisions set out under Part J of these Operational Terms as well as the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the J1 and/or J2 process steps set out in OSD 0711 (Bilateral Processes for Part J: Accredited Entity performed activity).

I. Change of meter

Purpose and scope of Process B7:

A change of a meter is the Wholesaler's responsibility as is the sizing and location of a meter and providing any required notice in relation to the location of the new meter. These processes set out the operational arrangements which apply where the Retailer or the Wholesaler requests a change of meter for reasons other than a fault at the meter, which is dealt with under Processes B5 or J1 and/or J2. For example, this Process B7 should be used where the Retailer proposes a change to the physical size or the location of an installed meter or to change to a meter of a different model.

Where the Retailer wishes to carry out the change of a meter, it may either:

- request the Wholesaler to carry out the change to the size, model or location of the meter (Process B7); or
- request approval from the Wholesaler to change the size or location of an installed meter using an Accredited Entity (Processes J1 and J2); or
- carry out the change of meter where the physical size and location of the new meter are the same as the physical size and location of the installed meter using an Accredited Entity, for example, where a different model (which is of the same size) is to be installed (Process J1 and/or J2).

Process B7 –Change to size, model or location of meter performed by the Wholesaler

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the B7 process steps set out in OSD 0703 (Bilateral Processes for Part B: Metering).

Process B8 – Retailer requested change to size or location of the meter performed by an Accredited Entity

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the provisions set out under Part J of these Operational Terms as well as the Common

Processes set out in OSD 0701 (Bilateral Common Processes) and the J1 and/or J2 process steps set out in OSD 0711 (Bilateral Processes for Part J: Accredited Entity performed activity).

Process B9 – Retailer requested change of meter performed by an Accredited Entity (other than a replacement following a fault or a change to the size or location of the meter)

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the provisions set out under Part J of these Operational Terms as well as the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the J1 and/or J2 process steps set out in OSD 0711 (Bilateral Processes for Part J: Accredited Entity performed activity).

Process B10 – Wholesaler requested installation or change of meter performed by the Wholesaler (other than a replacement following a fault)

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the B1 or B7 process steps set out in OSD 0703 (Bilateral Processes for Part B: Metering) for individual installations, or process D2 for a programme of work.

J. Retailer requested Meter Read for Non-Market Meters in respect of a Transfer or allocation of a Supply Point

Process B11 – Retailer request for Wholesaler to carry out Meter Read for a Non-Market Meter pending Transfer or allocation of a Supply Point

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the B11 process steps set out in OSD 0703 (Bilateral Processes for Part B: Metering).

K. Private Meters necessary for calculation of Primary Charges for Trade Effluent Services, or Trade Effluent Services and Foul Sewerage Services

Process B12 (merged) – Request relating to Private Meter or Cross Border meter

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the B12 process steps set out in OSD 0703 (Bilateral Processes for Part B: Metering).

Process B13 – Testing, repairing and replacing Private Meters necessary for calculation of Primary Charges for Trade Effluent Services, or Trade Effluent Services and Foul Sewerage Services

This process has been merged with B12 (merged) and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the B12 (merged) process steps set out in OSD 0703 (Bilateral Processes for Part B: Metering).

Process B14 – Exchanging Private Meters necessary for calculation of Primary Charges for Trade Effluent Services, or Trade Effluent Services and Foul Sewerage Services

This process has been merged with B12 (merged) and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the B12 (merged) process steps set out in OSD 0703 (Bilateral Processes for Part B: Metering).

L. Cross Border Meters necessary for the calculation of Primary Charges for Sewerage Services

Process B15 – Installing Cross Border Meters necessary for the calculation of Primary Charges for Sewerage Services

This process has been merged with B12 (merged) and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral

Common Processes) and the B12 (merged) process steps set out in OSD 0703 (Bilateral Processes for Part B: Metering).

Process B16 – Testing, repairing and replacing Cross Border Meters necessary for the calculation of Primary Charges for Sewerage Services

This process has been merged with B12 (merged) and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the B12 (merged) process steps set out in OSD 0703 (Bilateral Processes for Part B: Metering).

Process B17 – Exchanging Cross Border Meters necessary for the calculation of Primary Charges for Sewerage Services

This process has been merged with B12 (merged) and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the B12 (merged) process steps set out in OSD 0703 (Bilateral Processes for Part B: Metering).

Part C: Confirmation and verification of supply arrangements

General introduction

Part C (Confirmation and verification of supply arrangements) sets out the processes to be followed by the Retailer and the Wholesaler in the following circumstances:

- Process C1 applies when there is a requirement for the Wholesaler to verify meter details and meter records or supply arrangements;
- Processes C2 and C3 apply where a Gap Site is to be Registered with the Market Operator, either following investigations initiated by the Wholesaler or by the Retailer;
- Process C4 applies where the Wholesaler or Retailer considers that a Service Component is provided to an Eligible Premises but is not Registered;
- Process C5 applies where either the Wholesaler or Retailer consider that a Supply Point should be Deregistered (with no corresponding physical Disconnection) or that a Service Component should be removed; and
- Process C7 sets out the process to be followed when the Retailer requests an amendment to the VOA BA Reference, UPRN, or Supply Point address details at a Supply Point, or when the Wholesaler notifies an amendment to the VOA BA Reference, UPRN or Supply Point address details at a Supply Point.

The processes within this part C (Confirmation and verification of supply arrangements) are:

Number	Process
C1	Verification of meter details or supply arrangements
C2	Gap Sites identified by the Wholesaler
C3	Application in respect of Gap Sites proposed by the Retailer

Number	Process
C4	Identified Missing Service Components
C5	Deregistration of a Supply Point (including as a result of an incorrect or erroneous Registration or a change of circumstance) or removal of Service Components
C6	Application in respect of Deregistration of a Supply Point (including as a result of an incorrect or erroneous Registration) or a change of circumstance) or removal of Service Component at the request of the Retailer [no longer in use, merged with C5]
C7	Supply Point Verification

Process C1 – Verification of meter details or supply arrangements

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the C1 process steps set out in OSD 0704 (Bilateral Processes for Part C – confirmation and verification of supply arrangements).

Process C2 – Gap Sites identified by the Wholesaler

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the C2 process steps set out in OSD 0704 (Bilateral Processes for Part C – confirmation and verification of supply arrangements).

Process C3 – Application in respect of Gap Sites proposed by the Retailer

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the C3 process steps set out in OSD 0704 (Bilateral Processes for Part C – confirmation and verification of supply arrangements).

Process C4 – Identified Missing Service Components

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the C4

process steps set out in OSD 0704 (Bilateral Processes for Part C – confirmation and verification of supply arrangements).

Process C5 – Deregistration of a Supply Point (including as a result of an incorrect or erroneous Registration or a change of circumstance) or removal of Service Components

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the C5 process steps set out in OSD 0704 (Bilateral Processes for Part C – confirmation and verification of supply arrangements).

Process C6 – Application in respect of Deregistration of a Supply Point (including as a result of an incorrect or erroneous Registration or a change of circumstance) or removal of Service Component at the request of the Retailer

This process has been merged with C5 and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the C5 process steps set out in OSD 0704 (Bilateral Processes for Part C – confirmation and verification of supply arrangements).

Process C7 – Supply Point Address Amendment

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the C7 process steps set out in OSD 0704 (Bilateral Processes for Part C – Supply Point Address Amendment).

Part D: Planned activities and affected services

General introduction

Part D (Planned activities and affected services) sets out processes relating to the long-term planning, short-term planning and reactive activities carried out by the Wholesaler in relation to the provision of Water Services and/or Sewerage Services.

Under all these processes the Wholesaler shall notify the Retailer in advance of carrying out any planned work which it expects or reasonably should expect to have a material impact on its Water Services and/or Sewerage Services provided to the Retailer's Non-Household Customers (including planned interruptions to supply and any planned change to supply, including any change in pressure or change in the composition of water provided), or on the operations of the Retailer's Non-Household Customers. Such notifications shall be sent in accordance with the provisions of OSD0705 (Bilateral Processes for Part D – Planned activities and affected services).

In addition, the Wholesaler shall also directly notify those Non-Household Customers which the Wholesaler expects or reasonably should expect to be affected by such planned works. In this part D, a Non-Household Customer will be treated as being an affected Non-Household Customer if the Wholesaler expects or reasonably should expect that the works will have a material impact on the Water Services and/or Sewerage Services provided to it or on the operations of its business. If requested by the Wholesaler, the Retailer shall provide reasonable assistance to the Wholesaler to enable the Wholesaler to provide such notification to affected Non-Household Customers.

The Wholesaler should continue to conduct any public consultations, communications or campaigns that it manages in relation to planned activities affecting its Network and shall not exclude Non-Household Customers from those communications. The Wholesaler must also ensure that, where it is required to do so (for example when making a Disconnection for the purposes of carrying out works under section 60 of the Water Industry Act 1991) it provides notice to the Non-Household Customer and makes an alternative supply.

The Retailer may also notify its Non-Household Customer of any planned works covered by this part D which is reasonably likely to affect it, and the Wholesaler and the Retailer shall co-operate to ensure any such notifications are consistent with each other. Such co-operation shall include but is not necessarily limited to following the processes in this part D (Planned activities and affected services).

If, at any time, the Retailer becomes aware of any Drinking Water Supply Change, Sewer Flooding or Other Public Health Risk, it shall follow the **twenty-four (24)** hour contact arrangements described under heading C (24 hour contact arrangements) of part E (Unplanned events and incidents). For clarity, this may be at any time before, during or after planned works.

If circumstances change in respect of planned activities, the processes at part E (Unplanned events and incidents) may apply.

Purpose and scope of Processes D1, D2 and D3:

The Wholesaler must undertake long-term planning, short-term planning and reactive activities. These processes set out how the Retailer and Wholesaler shall interact in relation to such activities.

The processes within this part D (Planned activities and affected services) are:

Number	Process
D1	Notification of capital works that may have an impact on Non-Household Customers - long-term planning
D2	Short-term planned activities
D3	Reactive activities

Process D1 – Notification of capital works that may have an impact on Non-Household Customers - long-term planning

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the D1 process steps set out in OSD 0705 (Bilateral Processes for Part D: Planned activities and affected services).

Process D2 – Short-term planned activities

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the D2

process steps set out in OSD 0705 (Bilateral Processes for Part D: Planned activities and affected services).

Process D3 – Reactive activities

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the D3 process steps set out in OSD 0705 (Bilateral Processes for Part D: Planned activities and affected services).

Part E: Unplanned events and incidents

A. General introduction

This part E (Unplanned events and incidents) sets out the processes to be followed in relation to changes to Water Services and/or Sewerage Services which are not planned by or on behalf of the Wholesaler, for example Emergencies, potential drinking water quality incidents, pollution incidents and droughts.

The Wholesaler may have a number of plans in place for addressing how such events or incidents shall be managed and the processes in this part E (Unplanned events and incidents) must be followed in conjunction with those Wholesaler plans. Heading D (Management plans for unplanned events and incidents, including flooding) below sets out what the Wholesaler and Retailer are required to do in relation to those plans.

B. Roles and responsibilities

The Wholesaler is responsible for ensuring that the arrangements for the supply of water and disposal of sewage meet all required standards and for managing the provision of Water Services and/or Sewerage Services during any unplanned event or incident.

The Wholesaler is responsible for meeting any obligation it has to report unplanned events or incidents to any Relevant Authority, such as Defra, the Drinking Water Inspectorate and/or the Environment Agency or equivalent such as Natural Resources Wales; for liaising with them or

any other public authority in relation to the management of an unplanned event or incident and for taking any remedial or other steps required to resolve the event or incident¹.

The Retailer must support the Wholesaler in its management of such unplanned events by making available their Non-Household Customers' contact details on a mutually agreed basis and by following the processes set out in this part E (Unplanned events and incidents). The Retailer may also be required to support any other requests in relation to communication with the Retailer's Non-Household Customers. Such requests must always be reasonable and include, for example, requests to follow particular scripts when relaying information to its Non-Household Customers in respect of any unplanned events or incidents affecting Water Services and/or Sewerage Services.

In addition to notifying the Retailer of any planned interruptions to supply under part D (Planned activities and affected services), the Wholesaler shall also notify the Retailer of any unplanned interruptions or changes to supply including: changes in the composition of water provided or a decrease in water pressure to below the applicable minimum standard, which may take place within all or part of its Area and which are reasonably likely to affect the supply to the Retailer's Non-Household Customers.

Under this part E (Unplanned events and incidents) such notifications from the Wholesaler to the Retailer of unplanned events and incidents shall be sent through the Bilateral Hub and/or personal contact.

C. 24 hour contact arrangements

Effective and timely communication is essential in matters to do with protecting Non-Household Customers and public health. Communications need to be in two directions:

- in certain circumstances relevant and clear information needs to be provided to Non-Household Customers; and
- information from Non-Household Customers has to be received by the Wholesaler to allow relevant information to be collated and evaluated and for operational decisions to be made.

¹ The terms and definitions used in this Part E have been designed to align with those used by the Drinking Water Inspectorate but do not change or supersede anything required by the Drinking Water Inspectorate.

Consistent with that, the Retailer must:

- i. on a standing basis, provide information to its Non-Household Customers regarding the importance of reporting any unplanned change in Water Services and/or Sewerage Services and ask them to contact the Wholesaler directly in relation to any such unplanned change. Such unplanned changes may, for example, include any Drinking Water Supply Change, Sewer Flooding or Other Public Health Risk;
- ii. on a standing basis, inform its Non-Household Customers of the Wholesaler's contact details for such unplanned events and provide those details on its website and other appropriate communication media. In some cases, the Retailer may provide its Non-Household Customer with additional contact details;
- iii. on a standing basis or as part of general duties of maintaining customer details, provide available Non-Household Customer contact details including, where feasible, telephone numbers and SPIDs, to be used in unplanned events or incidents to the Wholesaler through mutually agreed arrangements. If Trading Parties agree to share Non-Household Customer contact details with the Wholesaler on a standing basis then at minimum these details should include telephone numbers and SPIDs, be updated every three hundred and sixty five (365) days and the Wholesaler must destroy all previously held Non-Household Customer contact details provided by the Retailer;
- iv. in its messages to and its communications with its Non-Household Customers, the Retailer shall make it clear for which Service Category or Service Categories the Non-Household Customer should contact the Wholesaler (rather than any Other Wholesaler, if applicable);
- v. be able effectively to receive information from the Wholesaler and pass information to its Non-Household Customers twenty-four (24) hours a day, for example in case it is required to support communications with any of its Non-Household Customers during an event or incident;
- vi. provide the Wholesaler with twenty-four (24) hour contact details on which the Wholesaler may contact the Retailer if the Retailer is required to support communications with any of its Non-Household Customers in relation to the identification or management of any event or incident, for example by providing the details of any on-call contact manager;
- vii. follow the industry standard in place from time to time in relation to the content of its messages to its Non-Household Customers telling them how they should respond and

when they should report any unplanned change in Water Services and/or Sewerage Services to the Wholesaler;

- viii. if the Retailer receives a communication from a Non-Household Customer in relation to an unplanned change in the supply of Water Services and/or Sewerage Services, including any Drinking Water Supply Change, Sewer Flooding or Other Public Health Risk, during the Retailer's business hours either:
 - a. transfer the Non-Household Customer directly to the Wholesaler (as appropriate depending on whether the Wholesaler is a Water Wholesaler or a Sewerage Wholesaler or both); or
 - b. provide the Non-Household Customer with the Wholesaler's contact details and tell them to contact the Wholesaler immediately as appropriate depending on whether the Wholesaler is a Water Wholesaler or Sewerage Wholesaler or both (which may be via automated voice messaging system);
- ix. ensure that any Non-Household Customer which tries to contact it outside the Retailer's business hours shall receive a message telling them to contact the Wholesaler directly in relation to any unplanned change in supply of Water Services and/or Sewerage Services including any Drinking Water Supply Change, Sewer Flooding or Other Public Health Risk and informing them of the Wholesaler's contact details; and
- x. ensure that any Non-Household Customer which tries to contact it outside the Retailer's business hours shall not receive a message simply informing them that the Retailer's offices are closed.

If the Retailer otherwise finds or receives other information which may relate to an actual or potential unconsented Trade Effluent discharge or an unplanned change in Water Services and/or Sewerage Services, including any Drinking Water Supply Change, Sewer Flooding or Other Public Health Risk, it shall inform the Wholesaler immediately, for example via the standing on-call arrangements described at points ii-iv above and point iii below.

The Retailer shall also inform the Wholesaler immediately of any actual or potential unconsented Trade Effluent discharge or unplanned change in Water Services and/or Sewerage Services, including any Drinking Water Supply Change, Sewer Flooding or Other Public Health Risk, which a Non-Household Customer reports to the Retailer if the Retailer for

any reason is concerned that the Non-Household Customer may not report the matter to the Wholesaler.

The Wholesaler must:

- i. also be able to receive information to allow it to manage events and incidents twenty-four (24) hours a day;
- ii. make its twenty-four hours a day/seven days a week (24/7) contact details for Non-Household Customers or other members of the public publicly available;
- iii. provide the Retailer with any different twenty-four (24) hour contact details which the Retailer should use for Retailer-Wholesaler communications, for example, standing on-call arrangements;
- iv. engage directly with any Non-Household Customer which contacts it in relation to an unplanned change in Water Services and/or Sewerage Services and, provided that the Non-Household Customer has given it sufficient information to correctly identify its Retailer, inform the Retailer of any such contact it has had with the Retailer's Non-Household Customers within **two (2)** Business Days; and
- v. direct any Non-Household Customer who contacts it in relation to any other matter to the Non-Household Customer's Retailer.

If the Wholesaler takes any action to notify customers at large of changes in the services supplied, for example issuing boil notices, or to provide any other information in relation to such an unplanned change such as issuing general explanations, it shall, in this context, treat Non-Household Customers as it would any member of the public and shall not exclude them from such communications. It shall also send a copy of any such communications to the Retailer. Whether via the Wholesaler-Retailer twenty-four (24) hour on-call arrangements, or otherwise, if the Wholesaler provides the Retailer with information about an unplanned change in Water Services and/or Sewerage Services it shall include an explicit statement at the beginning of any such communication as to whether it wishes the Retailer to:

- take action;
- prepare to take action; and/or
- be aware of the information in order to react appropriately to any enquiry which it receives.

Wherever appropriate, including wherever the Wholesaler wishes the Retailer to take action or prepare to take action, the Wholesaler shall pro-actively contact the Retailer to confirm receipt of the information, for example using the standing on-call arrangements set out under this heading C (24 hour contact arrangements).

D. Management plans for unplanned events and incidents, including flooding

The Wholesaler maintains a number of plans in order to help avoid or manage unplanned events and incidents. These include:

- long term plans such as water resource management or drought plans;
- emergency plans relating to performance of its obligations under the Security and Emergency Measures Directions; and
- incident management plans such as drinking water quality incident plans.

The Wholesaler may also operate:

- Public Health Related Site Specific Arrangements, for example setting out how water supplies to particular Eligible Premises such as hospitals or prisons shall be ensured; and
- Non-Public Health Related Site Specific Arrangements, for example for Non-Household Customers carrying out business processes which may be particularly sensitive to changes in the water supply.

In relation to its long term plans, the Wholesaler must include the Retailer in consultation on their preparation, revision or maintenance. It shall do so in light of any water resource management planning guidelines set by the Environment Agency or other Relevant Authority from time to time. Provided the Wholesaler has acted reasonably, for example by giving the Retailer sufficient time to collect information from its Non-Household Customers and respond to the Wholesaler, the Retailer must give the Wholesaler any information it reasonably requests in order to prepare or revise those plans. The Wholesaler shall also tell the Retailer where it may obtain a copy of any final or updated long term plan or otherwise provide a copy of the plan.

The Wholesaler must ensure that all its other emergency and incident management plans enable effective communication with Non-Household Customers. In particular, the plans should recognise that a Non-Household Customer may contact its Retailer about an unplanned change in Water Services and/or Sewerage Services and so set out the arrangements for how the Wholesaler shall work with the Retailer to respond effectively to such enquiries from its Non-Household Customer(s) or other stakeholders.

The Wholesaler’s plans may require the Retailer to follow reasonable additional or alternative steps to those set out in these processes in relation to communication with its Non-Household Customers.

In so far as the Wholesaler’s plans affect the Retailer, the Wholesaler shall consult with the Retailer in relation to the development or update of any of its plans. The Retailer shall provide the Wholesaler with any assistance that it reasonably requires for the preparation, update or testing of such plans.

The processes in this part E (Unplanned events and incidents) are not exclusive of each other. A Wholesaler may become aware of an event or incident under one plan or process, but move to another if it considers it appropriate, for example because circumstances change. Flooding events in particular may lead to drinking water quality incidents as well as Sewer Flooding and Other Public Health Risks.

In summary, the processes set out in this part E (Unplanned events and incidents) are designed to cover the following circumstances:

Process	Scope
E1	Identification of Sensitive Customers
E2	Maintaining and implementing Wholesaler Public Health Related Site Specific Arrangements for managing events and incidents potentially affecting public health
E3	Identifying and managing unplanned changes to the supply of Water Services and/or Sewerage Services
E4	Identifying and managing drinking water quality incidents
E5	Identifying and managing Sewer Flooding and Other Public Health Risks such as pollution incidents or unconsented Trade Effluent discharges
E6	Managing droughts or dry weather

Process	Scope
E7	Emergencies (i.e. events governed by the Security and Emergency Measures Directions)

Whichever plan or process is or may be applied, the Wholesaler and the Retailer must cooperate with each other at all times to help avoid, manage and remedy any unplanned change to Water Services and/or Sewerage Services, including any Drinking Water Supply Change, Sewer Flooding or Other Public Health Risk.

E. Access to information about Non-Household Customers to assist with the management of unplanned events or incidents

In order to manage any unplanned change to Water Services and/or Sewerage Services, the Wholesaler shall need certain information about Non-Household Customers in its Area. The following information shall be identified on the Central Systems:

- the Eligible Premises in an Area occupied by Sensitive Customers (see Process E1);
- the Eligible Premises in an Area covered by Public Health Related Site Specific Arrangements (see Process E2); and
- the Eligible Premises in an Area covered by Non-Public Health Related Site Specific Arrangements (see Process E2).

Whether or not an Eligible Premises is occupied by a Sensitive Customer, if the Wholesaler considers that it needs specific information in relation to a particular Eligible Premises in order to manage an unplanned event or incident, for example, twenty-four (24) hour on site contact details, it may establish a Public Health Related Site Specific Arrangement, or a Non-Public Health Related Site Specific Arrangement, for that Eligible Premises. Process E2 sets out the steps which the Wholesaler and Retailer shall take to identify that information, provide it to the Wholesaler and keep it up to date in respect of Public Health Related Site Specific Arrangements. The same Process E2 shall also be used for any Non-Public Health Related Site Specific Arrangements the Wholesaler may have in place.

In the case of a Sensitive Customer at an Eligible Premises the Wholesaler may also require the Retailer to take certain steps to support communication with its Non-Household Customer in the event of an unplanned change to Water Services and/or Sewerage Services.

Additionally, if the Wholesaler needs any further contact details for a particular Eligible Premises in order to investigate or manage any unplanned event or incident, it may ask the Retailer for them. If necessary, the Retailer shall seek those contact details from its Non-Household Customer and shall provide them to the Wholesaler where available.

F. Bogus Callers

In order to help facilitate the orderly functioning of the Competitive Market, the Wholesaler and the Retailer shall also inform each other if they become aware of bogus callers operating in any particular area.

Process E1 - Identification of Sensitive Customers

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the E1 process steps set out in OSD 0706 (Bilateral Processes for Part E: Unplanned events and incidents).

Process E2 – Maintenance and implementation of Wholesaler Public Health Related Site Specific Arrangements for managing events and incidents potentially affecting public health

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the E2 process steps set out in OSD 0706 (Bilateral Processes for Part E: Unplanned events and incidents).

Process E3 – Unplanned changes to supply of Water Services and/or Sewerage Services

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the E3 process steps set out in OSD 0706 (Bilateral Processes for Part E: Unplanned events and incidents).

Process E4 – Drinking water quality incidents

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the E4

process steps set out in OSD 0706 (Bilateral Processes for Part E: Unplanned events and incidents).

Process E5 – Sewer Flooding and Other Public Health Risks such as pollution incidents or unconsented Trade Effluent discharges

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the E5 process steps set out in OSD 0706 (Bilateral Processes for Part E: Unplanned events and incidents).

Process E6 – Droughts, dry weather conditions and other circumstances which give rise to water shortages

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the E6 process steps set out in OSD 0706 (Bilateral Processes for Part E: Unplanned events and incidents).

Process E7 – Emergencies (i.e. civil emergencies or national security events)

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the E7 process steps set out in OSD 0706 (Bilateral Processes for Part E: Unplanned events and incidents).

Part F: Monitoring, investigations, complaints and enquiries

A. General introduction

Part F (Monitoring, investigations, complaints and enquiries) sets out processes for the interaction between the Wholesaler, the Retailer and the Retailer's Non-Household Customers, including processes to be followed in relation to visits to Eligible Premises for monitoring or investigation purposes at heading B (Wholesaler visits to Eligible Premises for monitoring or investigation purposes) below.

Part F (Monitoring, investigations, complaints and enquiries) also sets out the processes to be followed in relation to planned visits not covered in other parts, as well as processes to be followed when enquiries or complaints are received from Non-Household Customers.

This part F does not apply to any enquiries, monitoring or other visits relating to Trade Effluent as these are covered by part G (Trade Effluent). Complaints relating to Trade Effluent are included in this part F in Process F5.

The processes within this part F (Monitoring, investigations, complaints and enquiries) are:

Number	Process
F1	Unannounced and/or unplanned visits to Eligible Premises relating to compliance
F2	Announced planned visits to Eligible Premises relating to compliance
F3	Visits by the Wholesaler to Eligible Premises not covered by the other processes
F4	Non-Household Customer enquiries
F5	Non-Household Customer complaints
F6	Water Fittings Regulations enquiries and notifications

Other processes in these Operational Terms may require site visits in order to fulfil the requirements of the processes, and the steps to be followed are set out accordingly. Where there is no such provision, Process F3 should be followed.

To the extent that the Wholesaler, in carrying out any planned or unplanned visits to Eligible Premises, is exercising any power of entry, the Wholesaler shall comply with all applicable Law, including any statutory timescales, in relation to any notices which require to be served on, or provided to, the Non-Household Customer.

B. Wholesaler visits to Eligible Premises for monitoring or investigation purposes

The Wholesaler may exercise any statutory power, including those under section 75 of the Water Industry Act 1991, and carry out visits to Eligible Premises for taking water samples for monitoring purposes or for conducting inspections in respect of the Water Fittings Regulations. It is sometimes the case that Non-Household Customers should not be given advance notice of such visits.

When the Wholesaler conducts such a visit to an Eligible Premises Registered to the Retailer, it shall use:

- Process F1 for unplanned visits (those which cannot be planned two (2) or more Business Days in advance), or planned visits where the Non-Household Customers are not to be given advance notice of such visits; and
- Process F2 for planned visits (those which can planned two (2) or more Business Days in advance) where the Non-Household Customers are to be given advance notice of such visits.

C. Non-Household Customer Complaints

The Retailer shall, on a standing basis, provide information to its Non-Household Customers regarding the Consumer Council for Water (CCW), including current contact details, to ensure that its Non-Household Customers are made aware of the function of CCW and their rights to refer complaints to it. Non-Household Customers shall also be informed by the Retailer that any complaint may be referred by CCW for determination to an alternative dispute resolution service (e.g. the Water Redress Scheme (WATRS)).

Process F1 - Unannounced and/or unplanned visits to Eligible Premises relating to compliance

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the F1 process steps set out in OSD 0707 (Bilateral Processes for Part F: Monitoring, investigations, complaints and enquiries).

Process F2 - Announced planned visits to Eligible Premises relating to compliance

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the F2 process steps set out in OSD 0707 (Bilateral Processes for Part F: Monitoring, investigations, complaints and enquiries).

Process F3 – Visits by the Wholesaler to Eligible Premises not covered by other processes

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the F3 process steps set out in OSD 0707 (Bilateral Processes for Part F: Monitoring, investigations, complaints and enquiries).

Process F4 –Non-Household Customer enquiries

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the F4 process steps set out in OSD 0707 (Bilateral Processes for Part F – Monitoring, investigations, complaints and enquiries).

Process F5 – Non-Household Customer complaints

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the F5

process steps set out in OSD 0707 (Bilateral Processes for Part F – Monitoring, investigations, complaints and enquiries).

Process F6 – Water Fittings Regulations enquiries and notifications

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the F6 process steps set out in OSD 0707 (Bilateral Processes for Part F: Monitoring, investigations, complaints and enquiries).

Part G: Trade Effluent

A. General introduction

Part G (Trade Effluent) sets out the processes to be followed by the Wholesaler and the Retailer in relation to the application and modification of Trade Effluent Consents (including temporary or time limited Trade Effluent Consents, letters of authorisation and consents in relation to low risk discharges), monitoring Trade Effluent discharges, or the discontinuation or termination of Trade Effluent Consents. For these purposes a discontinuation of a Trade Effluent Consent means a temporary suspension of the consent (which may be for an unlimited period).

Any application for re-activation of a discontinued Trade Effluent Consent, together with any application for a new Trade Effluent Consent, will be subject to approval by the Wholesaler (which may be given subject to conditions) in accordance with Process G2 (Merged) below.

This part G (Trade Effluent) also sets out the process for dealing with Trade Effluent enquiries. For notification and management of unconsented discharges and other Trade Effluent pollution incidents, part E (Unplanned events and incidents) will apply.

The processes within this part G (Trade Effluent) are:

Number	Process
G1	Trade Effluent enquiries
G2 (Merged)	Trade Effluent Consents
G3	Variation of Trade Effluent Consents [no longer in use, merged with G2]
G4	Trade Effluent monitoring
G5	Discontinuation of Trade Effluent Consent [no longer in use, merged with G2]
G6	Termination of Trade Effluent Consent [no longer in use, merged with G2]

B. Referrals to other agencies

In some circumstances, the Wholesaler may be required to refer Trade Effluent matters to appropriate agencies, such as the Environment Agency or the Natural Resources Wales and/or keep them informed of Trade Effluent matters. In those cases the Wholesaler should follow any processes and communication protocols agreed between it and those appropriate agencies. The Wholesaler must also inform the Retailer where they have made such a referral within two (2) Business Days and shall provide the Retailer with any information with respect to the referral that the Retailer reasonably requests. The existing enforcement and communication provisions shall be otherwise unaffected.

C. References to legislation

A reference to a statute, statutory provision or any subordinate legislation shall, unless otherwise stated, be construed in accordance with paragraph 1.1.10 of part B (Definitions and interpretation) of Schedule 1 Part 1 (Objectives, Principles and Definitions) of the Wholesale Contract.

Process G1 – Trade Effluent enquiries

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the G1 process steps set out in OSD 0708 (Bilateral Processes for Part G – Trade Effluent).

Process G2 (Merged) – Trade Effluent Consents

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the G2 process steps set out in OSD 0708 (Bilateral Processes for Part G – Trade Effluent).

Process G3 – Variation of Trade Effluent Consents

This process has been merged with G2 and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the G2 process steps set out in OSD 0708 (Bilateral Processes for Part G – Trade Effluent).

Process G4 – Trade Effluent monitoring

This process is no longer part of the Operational Terms. Trading Parties shall perform Trade Effluent monitoring as set out in CSD 0206 (Trade Effluent Processes).

(Equivalent to Scottish Operational Code Process 23)

Process G5 – Discontinuation of Trade Effluent Consent

This process has been merged with G2 and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the G2 process steps set out in OSD 0708 (Bilateral Processes for Part G – Trade Effluent).

Process G6 – Termination of Trade Effluent Consent

This process has been merged with G2 and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the G2 process steps set out in OSD 0708 (Bilateral Processes for Part G – Trade Effluent).

Part H: Allowances, assessment requests and applications

General introduction

Part H (Allowances, assessment requests and applications) sets out the processes that the Wholesaler and the Retailer shall follow when the Retailer wishes to apply for an allowance or Volumetric Adjustment in respect of a Wholesale Charge (for example in respect of leaks or bursts), a Contribution Offer in respect of installing a meter at an Unmeasured or Assessed Service Component at a Supply Point, review of charges in respect of an Assessed Supply Point or for a Gap Site or Vacancy Incentive Scheme Payment.

This part H (Allowances, assessment requests and incentive applications) also includes the processes by which the Wholesaler or the Retailer may make or apply for a change in the Tariff applied to any of its Non-Household Customer's Service Components.

The processes within this part H (Allowances, assessment requests and applications) are as follows:

Number	Process
H1	Application for an allowance and/or Volumetric Adjustment
H2	Application for a Contribution Offer in respect of installing a meter at an Unmeasured or Assessed Service Component [no longer in use, merged with B1 and B7]
H3 (merged)	Review of unmetered charges or change in Tariff
H4	Wholesaler notice of change in Tariff applied to a Service Component [no longer in use, merged with H3 (merged)]
H5	Retailer application for change in Tariff applied to a Service Component [no longer in use, merged with H3 (merged)]
H6	[NOT IN USE]
H7	Application for Vacancy Incentive Scheme Payment

Process H1 – Application for an allowance and/or Volumetric Adjustment

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the H1 process steps set out in OSD 0709 (Bilateral Processes for Part H – Allowances, Volumetric Adjustments, assessment requests and applications).

Where a Wholesaler identifies the need for a Volumetric Adjustment in the progression of a Request for another process, the Wholesaler shall ensure any Volumetric Adjustments to the Central Systems are made in accordance with the Market Terms as part of and before completion of that Request. A Wholesaler shall only raise a H1 Request where the need to complete a Volumetric Adjustment has been identified outside the course of progressing an existing Request.

Process H2 – Application for a Contribution Offer in respect of installing a meter at an Unmeasured or Assessed Service Component

This process has been merged with B1 and B7 and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the B1 and B7 process steps set out in OSD 0703 (Bilateral Processes for Part B: Metering)

Process H3 (merged) – Review of unmetered charges or change in Tariff

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the H3 (merged) process steps set out in OSD 0709 (Bilateral Processes for Part H – Allowances, Volumetric Adjustments, assessment requests and applications).

Process H4 – Wholesaler notice of change in Tariff applied to a Service Component

This process has been merged with H3 (merged) and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the H3 (merged) process steps set out in OSD 0709 (Bilateral Processes for Part H – Allowances, Volumetric Adjustments, assessment requests and applications).

Process H5 – Retailer application for change in Tariff applied to a Service Component

This process has been merged with H3 (merged) and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the H3 (merged) process steps set out in OSD 0709 (Bilateral Processes for Part H – Allowances, Volumetric Adjustments, assessment requests and applications).

Process H6 [NOT IN USE]

Process H7 - Application for Vacancy Incentive Scheme Payment

Purpose and scope of Process H7:

This process sets out the steps that the awarding Wholesaler, the applying Retailer, and, where relevant, the registered Retailer, shall follow where the Wholesaler offers a financial incentive under the Vacancy Incentive Scheme and the applying Retailer wishes to claim a payment in respect of that scheme.

This process will be followed in conjunction with the Vacancy Incentive Scheme Guidance which sets out the eligibility criteria for when a Retailer can claim an incentive payment.

Details of the value of any such incentive shall be clearly set out in the awarding Wholesaler's Wholesaler Tariff Document and a copy of this information included in the Vacancy Incentive Scheme Guidance.

Where Water Services and Sewerage Services at the Vacant Premises are provided by the same Wholesaler, an application relating to any Vacancy Incentive Scheme Payment as set

out in the Vacancy Incentive Scheme Guidance and in the awarding Wholesaler's Wholesale Tariff Document may be made to the single awarding Wholesaler. Otherwise separate applications may need to be made to each awarding Wholesaler as applicable.

The relevant Form to use for this process is Form H/06 (Application for Vacancy Incentive Scheme Payment).

Any dispute arising between the applying Retailer and awarding Wholesaler in relation to this Process H7 may be dealt with in accordance with Part I (Disputes) of the Business Terms.

Process:

A: Where the applying Retailer is registered for the Vacant Premises

Step 1

On receipt of notification from the Market Operator of the change of occupancy status of the relevant Supply Points in accordance with the Market Terms, the applying Retailer will contact the customer to inform it that:

- a) it will be billed as a Non-Household Customer
- b) the applying Retailer will be serving it; and
- c) the Non-Household Customer may change to a Retailer of its choice.

Step 2

Within **five (5)** Business Days of its receipt of notification from the Market Operator of the change in occupancy status of the relevant Supply Points in accordance with the Market Terms, the applying Retailer shall submit Form H/06 to the awarding Wholesaler requesting payment of the Vacancy Incentive Scheme Payment in respect of that Vacant Premises.

Form H/06 must include the basic Non-Household Customer information and SPID information requested in it and a declaration that the applying Retailer considers the Vacant Premises to be eligible for a Vacancy Incentive Scheme Payment, including a statement that the current occupant is not the same as the last known occupant. For metered premises, a meter reading must be submitted to CMOS prior to the application being submitted to the awarding Wholesaler.

Step 3

As applicable under the terms of the Vacancy Incentive Scheme Guidance, the Wholesaler may reject the Form H/06 if:

- the Form H/06 is materially incomplete or contains incorrect information;
- the Vacant Premises is not Registered as a Supply Point in the Supply Point Register; and/or
- the Vacant Premises does not meet the eligibility criteria set out in the Vacancy Incentive Scheme Guidance.

If the awarding Wholesaler wishes to reject the Form H/06 for any of these reasons it must do so within **five (5)** Business Days of receiving it and shall explain the reasons for the rejection.

If the awarding Wholesaler rejects the Form H/06 due to the Form being materially incomplete or containing incorrect information, the applying Retailer may re-start this process at Step 2 by arranging for an updated Form H/06 to be re-submitted with the required information within **five (5)** Business Days of receiving the notification of rejection from the awarding Wholesaler.

Step 4

If the awarding Wholesaler does not reject Form H/06 under Step 3, the awarding Wholesaler must confirm its acceptance of the applying Retailer's application no later than **five (5)** Business Days after the date of receipt of the materially complete Form H/06 from the applying Retailer.

Once the application is accepted, the awarding Wholesaler will make payment in accordance with its published invoicing calendar in accordance with Section 9 of the Business Terms.

Step 5

If the applying Retailer wishes to challenge the Vacancy Incentive Scheme Payment received, it must do so within **ten (10)** Business Days of receipt of the payment. Thereafter, the awarding Wholesaler shall have **ten (10)** Business Days from its receipt of the applying Retailer's challenge to reply.

If the awarding Wholesaler upholds the applying Retailer's challenge, the awarding Wholesaler shall make any further payment due to the applying Retailer in accordance with the application for Vacancy Incentive Scheme Payment.

B: Where the applying Retailer is not registered for the Vacant Premises

Step 1

The applying Retailer will submit an application for Vacancy Incentive Scheme Payment to the awarding Wholesaler. This will include a completed Form H/06 including a signed declaration of eligibility and any other supporting evidence.

Step 2

Within **ten (10)** Business Days following receipt of an application for Vacancy Incentive Scheme Payment, the awarding Wholesaler will either:

- a. if the application is materially complete, and the relevant Supply Points satisfy the eligibility criteria set out in the Vacancy Incentive Scheme Guidance, submit the completed Form H/06, including the signed declaration of eligibility and any other supporting evidence received, to the registered Retailer, and inform the applying Retailer that it has done so; or
- b. reject the application on the grounds that:
 - the Form H/06 is materially incomplete or contains incorrect information;
 - the Vacant Premises is not Registered as a Supply Point in the Supply Point Register; and/or
 - the Vacant Premises does not meet the eligibility criteria set out in the Vacancy Incentive Scheme Guidance;

and inform the applying Retailer that the application has been rejected, stating the reason for rejection.

Step 3

Within **twenty (20)** Business Days after receipt of an application for Vacancy Incentive Scheme Payment, the registered Retailer must either:

- (a) follow the process set out in Step 4;
- (b) follow the process set out in Step 5; or
- (c) follow the process set out in Step 6.

If the registered Retailer fails to complete (a) – (c) above, the applying Retailer may raise a challenge in accordance with the challenge process set out in the Vacancy Incentive Scheme Guidance.

Step 4

If the registered Retailer does not dispute that the premises is occupied, it must

- a) update the SPID to occupied in CMOS using the date of occupation provided by the applying Retailer or, if later, the date that the registered Retailer acquired the SPID; and
- b) contact the customer to inform it that:
 - i. it will be billed as a Non-Household Customer;
 - ii. the registered Retailer will be serving it; and
 - iii. the Non-Household Customer may change to a Retailer of its choice.

Where the registered Retailer believes that the date of occupation given by the applying Retailer is incorrect, it will confirm the correct date and revise the date in CMOS.

Step 5

If the registered Retailer believes that the premises should be deregistered (for example, due to being a duplicate SPID, merged property, domestic property, etc.), it will submit Form C/03 to the awarding Wholesaler requesting that the SPID is deregistered from the market, and notify the applying Retailer that it has done so.

In the event that the deregistration request is rejected by the awarding Wholesaler, the registered Retailer will, within **five (5)** Business Days of the rejection, either change the SPID to occupied in accordance with Step 4 or reject the application in accordance with Step 6.

In the event that the deregistration request is accepted by the awarding Wholesaler, the registered Retailer will notify the applying Retailer.

Step 6

If the registered Retailer believes that the premises is correctly flagged as vacant, it may reject the application, notifying the applying Retailer and the awarding Wholesaler of the rejection and reasons for it.

Step 7

Within **ten (10)** Business Days of an application being rejected as per Steps 5 or 6, the applying Retailer will either:

- (a) contest the rejection in accordance with the challenge process set out in the Vacancy Incentive Scheme Guidance; or
- (b) withdraw the application,

in either case, notifying the awarding Wholesaler and the registered Retailer that it is doing so.

If the applying Retailer does not do either of (a) or (b) above within **ten (10)** Business Days of an application being rejected, the applying Retailer will be deemed to have withdrawn the application.

Step 8

Where an application for a Vacancy Incentive Scheme Payment results in a change to a premises' status from vacant to occupied in CMOS, the awarding Wholesaler shall, within **twenty (20)** Business Days of receipt of notification of such change, confirm to the applying Retailer that it will make payment of the Vacancy Incentive Scheme Payment. The awarding Wholesaler will then make payment in accordance with its published invoicing calendar in accordance with Section 9 of the Business Terms.

Part I: Disconnections

A. General introduction

(Part I is drawn from the Scottish Disconnections Document)

Part I (Disconnections) sets out the processes by which the Wholesaler and Retailer should interact in relation to making either Temporary Disconnections or Permanent Disconnections of some or all of the water connections to an Eligible Premises, and any subsequent reconnections. This part also sets out the process to be followed for gaining entry to an Eligible Premises for the purposes of Disconnection using the Wholesaler's powers of entry and for Disconnections for non-payment in the case of Self Supply Retailers.

In addition to following the processes set out here, the Wholesaler and Retailer shall follow and observe any statutory or other requirements. For example:

- any consumer protection or debt management guidelines as well as any payment terms agreed between the Retailer and its Non-Household Customer, or in the case of a Self Supply Retailer between the Wholesaler and that Self Supply Retailer. These processes assume all such customer protection or debt management steps have been taken before the processes are initiated; and
- that the Wholesaler informs any other Relevant Authority, such as the Environmental Health Department, Animal Health and Veterinary Laboratories Agency and/or Defra, where it is required to do so.

B. Grounds for Disconnection

Disconnections may be made in various circumstances, including those set out in sections 60 to 62, 75, 116 and schedule 4A of the Water Industry Act 1991. Broadly, the circumstances include:

- Disconnections necessary to complete works;
- Disconnections for non-payment; and
- Disconnections necessary to prevent contamination.

Certain Non-Household Customers cannot be Disconnected for non-payment. This includes the list set out in schedule 4A of the Water Industry Act 1991 such as care homes, hospitals and prisons.

Whenever required, for example when a Non-Household Customer of Sewerage Services who is lawfully using the Sewerage System has to be Disconnected to allow works to take place, or where a supply of water for domestic purposes is to be interrupted for more than twenty-four (24) hours, the Wholesaler shall make alternative arrangements for the provision of Water Services and/or Sewerage Services before the Disconnection.

Where the supply of Water Services and/or Sewerage Services is shutdown to allow for works to be undertaken on the Network and all Retailers need to be advised in advance, the relevant

processes set out in parts D (Planned activities and affected services) and E (Unplanned events and incidents) should be used and not the processes set out in this part I (Disconnections).

Where the Retailer is required under these processes to send a copy of the Disconnection notice to any Other Wholesaler and/or Other Retailer, it is expected that if the Other Wholesaler or Other Retailer notices any reason why the Disconnection should not proceed they should inform the Wholesaler as soon as possible.

C. Temporary and Permanent Disconnections

Permanent Disconnections are those where a connection to the Network is removed or otherwise made unworkable such that the supply of Water Services and/or Sewerage Services at that point could only resume if a new connection was made. All other Disconnections are Temporary Disconnections, which may subsequently be reconnected without a new connection being made.

D. Standard and non-standard Disconnections

Throughout these processes, references to 'standard' Disconnections includes those Disconnections which are charged by reference to a specified standard price within the Wholesaler's Wholesale Tariff Document. References to 'non-standard' Disconnections includes those Disconnections for which the Wholesaler's Wholesale Tariff Document sets out the price point other than the standard price or it provides for a quotation for the work to be done. If the Disconnection is a non-standard one, the Retailer must confirm its acceptance of any quotation or the non-standard charge before it is required to pay that non-standard Wholesale Charge.

E. Overview of Disconnection processes

Table 1: Overview of Disconnection processes

Number	Process
I1	Disconnections
I2	Disconnection requested by the Retailer and performed by an Accredited Entity in relation to Non-Household Customer non-payment [no longer in use, moved under processes J1 and J2]
I3 (merged)	Reconnections (Disconnections performed by the Wholesaler for illegal use is no longer in use and merged with I1)
I4	Disconnection performed by the Wholesaler for breach of Water Fittings Regulations [no longer in use, merged with I1]
I5	Disconnection requested by the Non-Household Customer and performed by the Wholesaler [no longer in use, merged with I1]

Number	Process
I6	Disconnection requested by the Non-Household Customer and performed by an Accredited Entity [no longer in use, moved under processes J1 and J2]
I7	Gaining entry to an Eligible Premises for the purposes of Disconnection using the Wholesaler's powers of entry at Retailer request [no longer in use, merged with I1]
I8	Reconnection requested by the Retailer and performed by the Wholesaler [no longer in use, merged with I3 (merged)]
I9	Reconnection requested by the Retailer and performed by an Accredited Entity [no longer in use, moved under processes J1 and J2]
I10	Reconnection performed by the Wholesaler following rectification of a breach of Water Fittings Regulations [no longer in use, merged with I3 (merged)]
I11	Reconnection performed by the Wholesaler following a Disconnection requested by a Non-Household Customer [no longer in use, merged with I3 (merged)]
I12	Reconnection performed by an Accredited Entity following a Disconnection requested by a Non-Household Customer [no longer in use, moved under processes J1 and J2]
I13	Disconnection performed by the Wholesaler in relation to non-payment in cases of a Self-Supply Retailer [no longer in use, merged with I1]

Process I1 – Disconnections

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the I1 process steps set out in OSD 0710 (Bilateral Processes for Part I – Disconnections & Reconnections).

Process I2 – Disconnection requested by the Retailer and performed by an Accredited Entity in relation to Non-Household Customer non-payment

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the provisions set out under Part J of these Operational Terms as well as the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the J1 and/or J2 process steps set out in OSD 0711 (Bilateral Processes for Part J: Accredited Entity performed activity).

Process I3 – Disconnection performed by the Wholesaler for illegal use

This process has been merged with I1 and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the I1 process steps set out in OSD 0710 (Bilateral Processes for Part I – Disconnections & Reconnections).

Process I4 – Disconnection performed by the Wholesaler for breach of Water Fittings Regulations

This process has been merged with I1 and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the I1 process steps set out in OSD 0710 (Bilateral Processes for Part I – Disconnections & Reconnections).

Process I5 - Disconnection requested by the Non-Household Customer and performed by the Wholesaler

This process has been merged with I1 and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the I1 process steps set out in OSD 0710 (Bilateral Processes for Part I – Disconnections & Reconnections).

Process I6 – Disconnection requested by the Non-Household Customer and performed by an Accredited Entity

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the provisions set out under Part J of these Operational Terms as well as the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the J1 and/or J2 process steps set out in OSD 0711 (Bilateral Processes for Part J: Accredited Entity performed activity).

Process I7 – Gaining entry to an Eligible Premises for the purposes of Disconnection using the Wholesaler's powers of entry at Retailer request

This process has been merged with I1 and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the I1 process steps set out in OSD 0710 (Bilateral Processes for Part I – Disconnections & Reconnections).

F. Reconnections

Temporary Disconnections may be reconnected, for example, where a Non-Household Customer settles any outstanding amounts.

Permanent Disconnections cannot be reconnected. Water Services and/or Sewerage Services could only be resumed where a new connection is made.

The relevant Form to use for processes I8 to I12 is Form I/04 (Request for reconnection of a supply which has been temporarily disconnected).

Process I8 – Reconnection requested by the Retailer and performed by the Wholesaler

This process has been merged with I3 (merged) and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the I3 process steps set out in OSD 0710 (Bilateral Processes for Part I – Disconnections & Reconnections).

Process I9 – Reconnection requested by the Retailer and performed by an Accredited Entity

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the provisions set out under Part J of these Operational Terms as well as the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the J1 and/or J2 process steps set out in OSD 0711 (Bilateral Processes for Part J: Accredited Entity performed activity).

Process I10 – Reconnection performed by the Wholesaler following rectification of a breach of Water Fittings Regulations

This process has been merged with I3 (merged) and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the I3 process steps set out in OSD 0710 (Bilateral Processes for Part I – Disconnections & Reconnections).

Process I11 – Reconnection performed by the Wholesaler following a Disconnection requested by the Non-Household Customer

This process has been merged with I3 (merged) and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the I3 process steps set out in OSD 0710 (Bilateral Processes for Part I – Disconnections & Reconnections).

Process I12 – Reconnection performed by an Accredited Entity following a Disconnection requested by the Non-Household Customer

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the provisions set out under Part J of these Operational Terms as well as the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the J1 and/or J2 process steps set out in OSD 0711 (Bilateral Processes for Part J: Accredited Entity performed activity).

Process I13 – Disconnection performed by the Wholesaler in relation to non-payment in cases of a Self-Supply Retailer

This process has been merged with I1 and shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the I1 process steps set out in OSD 0710 (Bilateral Processes for Part I – Disconnections & Reconnections).

Part J: Accredited Entity performed activity

A. General introduction

Part J (Accredited Entity performed activity) sets out the processes to be followed by the Retailer and the Wholesaler in the following circumstances:

- Process J1 applies when the Wholesaler's accreditation scheme requires the Retailer to provide the Wholesaler with advance notice in relation to Metering, Disconnection or Reconnection activities to be performed by an Accredited Entity;
- Process J2 applies when the Retailer is required to notify the Wholesaler of Metering, Disconnection or Reconnection activities completed by an Accredited Entity.

Therefore, Process J1 shall be followed only where the Wholesaler's accreditation scheme requires advance notice of Accredited Entity works, while Process J2 shall be followed upon completion of such works in any circumstances.

The processes within this part J (Accredited Entity performed activity) are:

Number	Process
J1	Advance notice of activities performed by an Accredited Entity
J2	Notifying of activities completed by an Accredited Entity

B. Use of Accredited Entities to undertake Metering Activity

Where an Accredited Entity is to undertake Metering Activity, it shall comply with any requirements of the accreditation arrangements as they relate to metering equipment.

Where a meter is removed under any of these processes, any replacement meter must be installed on the same day and, unless otherwise specified, be of the same physical size and in the same location as the removed meter.

Where the Retailer wishes to use an Accredited Entity to undertake Metering Activities, the Accredited Entity must have entered into an agreement for undertaking such activities with the Wholesaler. All Metering Activity must be carried out in accordance with any approval issued by the Wholesaler, including all applicable standards and procedures as set out in its accreditation scheme. This may include arrangements for removal of any data logging equipment.

Installation of a meter performed by an Accredited Entity

These processes set out the operational arrangements which apply where the Retailer initiates the request and wishes to carry out the meter installation work using an Accredited Entity.

These processes apply to the installation of meters at Eligible Premises where no meter is currently installed, including:

- where the Water and/or Sewerage Services received are currently Unmeasured or Assessed, including following an Assessment Request under Process H3; or
- following agreement of a Contribution Offer under Process B1.

These processes do not apply to meters which are installed in relation to new connections or Gap Sites, which are dealt with under Processes C2 and C3 in part C (Confirmation and verification of supply arrangements).

Meter accuracy test performed by an Accredited Entity

These processes set out the operational arrangements which apply where the Wholesaler is a Water Wholesaler and the Retailer is a Water Retailer and wishes a meter accuracy test to be performed by an Accredited Entity.

Where the meter is tested it will normally be removed and replaced with a new meter to allow the testing to take place. There may be cases where the test can be carried out in situ and in those cases, such as where a configuration leading to an inaccurate reading is confirmed, the Wholesaler shall take such steps to rectify the situation as is needed, such that the meter shall be able to make an accurate record of the consumption of water. However, in all other cases, where the meter is removed to be tested, a replacement meter must be installed on the same day that the meter to be tested is removed and will normally be the same physical size and location as the removed meter. There may be cases where the meter is incorrectly sized, leading to an incorrect reading, in which case any request by the Retailer for a replacement meter will be dealt with in accordance with Processes B7 or J1 and/or J2.

Wherever a meter accuracy test conducted under these processes shows that a meter has been recording inaccurately, the Wholesaler shall notify the Market Operator of any Volumetric Adjustment in accordance with the Market Terms.

Repair or replacement of a faulty meter performed by an Accredited Entity

These processes set out the operational arrangements which apply where the Retailer identifies a meter fault and wishes to carry out the repair or replacement of the meter using an Accredited Entity.

Where the meter is replaced under these Processes J1 and J2, the physical size and location of the installed meter must be the same as the physical size and location of the removed meter. If the size or location of the meter caused the fault, Processes B7 or J1 and/or J2 (which relate to changes to the physical size or location of the meter) should be followed.

Change of meter performed by an Accredited Entity

These processes set out the operational arrangements which apply where the Retailer wishes to either:

- request approval from the Wholesaler to change the size or location of an installed meter using an Accredited Entity; or

carry out the change of meter where the physical size and location of the new meter are the same as the physical size and location of the installed meter using an Accredited Entity, for example, where a different model (which is of the same size) is to be installed.

C. Use of Accredited Entities to undertake Disconnection or Reconnection activities

These processes shall also apply where Accredited Entities (including any Retailer who holds any necessary accreditations) can undertake the Disconnection or the Reconnection.

Disconnection performed by an Accredited Entity

Where the Retailer is a Water Retailer, it may arrange for some or all of its Non-Household Customer's Water Services to be Disconnected if that Non-Household Customer has not paid an invoice properly due in accordance with the Retailer's terms and conditions and any applicable statutory or other regulatory requirements.

The Retailer may also arrange for an Accredited Entity to perform the Disconnection where this was requested by the Non-Household Customer.

These processes set out how the Wholesaler (where it is a Water Wholesaler) and Retailer (where it is a Water Retailer) shall interact with respect to such Disconnections where an Accredited Entity performs the Disconnection.

Section 61 of the Water Industry Act 1991 applies to Disconnections for non-payment.

Reconnection performed by an Accredited Entity

Temporary Disconnections may be reconnected, for example, where a Non-Household Customer settles any outstanding amounts.

Permanent Disconnections cannot be reconnected. Water Services and/or Sewerage Services could only be resumed where a new connection is made.

The Retailer may arrange for an Accredited Entity to perform the Reconnection following a Temporary Disconnection.

Process J1 – Advance notice of activities performed by an Accredited Entity

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the J1 process steps set out in OSD 0711 (Bilateral Processes for Part J: Accredited Entity performed activity).

Process J2 – Notifying of activities completed by an Accredited Entity

This process shall be performed through the Bilateral Hub. Trading Parties shall comply with the Common Processes set out in OSD 0701 (Bilateral Common Processes) and the J2

process steps set out in OSD 0711 (Bilateral Processes for Part J: Accredited Entity performed activity).
